Summary and major assumptions

Overview of the FY12 corporate earnings outlook

In this report, we collate earnings forecast data issued by our analysts, and then analyze that data. For FY12, our analysts forecast sales growth of 2.0% y-y and recurring profit growth of 5.4% for companies in the Russell/Nomura Large Cap Index (ex financials). Compared with our previous forecasts in September (data collated on 26 August), these figures represent a downward revision of 1.3ppt for sales and of 8.9ppt for recurring profits. Excluding utilities, which we expect to incur recurring losses for the second year in a row, we expect recurring profits to rise 6.1% in FY12 (versus our previous forecast of 15.5% growth). We have lowered our absolute recurring profit forecast for the Russell/Nomura Large Cap Index (ex financials) by ¥1,749.4bn, the second consecutive quarter we have cut our projection.

The latest revisions to our corporate earnings outlook reflect FY12 H1 results. In H1, recurring profits at the Russell/Nomura Large Cap Index (ex financials) fell 6.5% y-y, worse than the pre-release forecast of a 4.4% decline. Sales in FY12 Q1 increased 5.7%, strongly reflecting the impact of the earthquake on economic activity a year earlier, but growth slowed to 0.2% in Q2. That said, while the deterioration in the macroeconomic environment became clearer in Q2, the fall in recurring profits contracted from 9.0% in Q1 to 1.3% in Q2 owing to (1) an end to the deterioration in earnings seen in Q1 at emerging market-related sectors such as basic materials, machinery and trading companies, and (2) smaller losses for the utilities sector owing to weaker crude oil prices.

Although a further downturn in economic sentiment is a concern, the yen has recently been weakening for the first time in a while. Our latest estimates assume USD/JPY of 78.7 and EUR/JPY of 100.3 over full-year FY12 (versus our previous assumptions of 79.3 and 98.5, respectively). We estimate that each ¥1 weakening against the dollar boosts recurring profits for the Russell/Nomura Large Cap Index (ex financials) by 0.87%, and each ¥1 weakening against the euro boosts them by 0.28%. Our latest forecasts assume USD/JPY of 78 and EUR/JPY of 100 (versus our previous assumptions of 79 and 97, respectively) for FY12 H2, but assuming other conditions remain the same and H2 exchange rates of USD/JPY of 82 and EUR/JPY of 106, our recurring profit projection would be growth of 8.1%, 2.7ppt higher than our current estimate.

Based on our latest forecasts, we project ROE of 6.2% for the Russell/Nomura Large Cap Index, a 1.0ppt downward revision versus our previous forecast of 7.2%. We now expect the net margin at the Russell/Nomura Large Cap Index (ex financials) to come in at 2.4% over the full year, versus our previous forecast of 2.8%.

Overview of the FY13 corporate earnings outlook

For FY13, our analysts forecast sales growth of 2.9% y-y and recurring profit growth of 23.2% for companies in the Russell/Nomura Large Cap Index (ex financials). This represents a 0.4ppt downward revision to sales growth but a 3.2ppt upward revision to recurring profit growth versus our previous forecasts. However, this does not mean we have changed to a bullish outlook for FY13 as we have lowered our absolute recurring profit forecast by a substantial ¥1,437.4bn.

Our analysts currently expect recurring profits to come in at 79% of their recent FY07 peak in FY13, before recovering in FY14 to 90% of their peak, and then possibly beating it at last in FY15.

Our FY13 estimates assume USD/JPY of 78 and EUR/JPY of 100 over the full year (versus our previous assumptions of 79 and 97, respectively). For FY13, if all other conditions remain the same as above but our forex assumptions were USD/JPY of 82 and EUR/JPY of 106, respectively, our recurring profit estimate would be for growth of 26.3% y-y, 3.1ppt higher than our current forecast.

Contributions to recurring profit growth by sector for the Russell/Nomura Large Cap Index

Overview of the FY12 corporate earnings outlook

For FY12, we forecast that recurring profits will increase in 12 of the 19 sectors and decline in seven. Sectors we project will post substantial growth in profits and make large contributions to overall profit growth in FY12 are automobiles, electrical machinery & precision equipment, financials, transportation and telecommunications. We expect most of this contribution to come from the automobiles sector, and think profit growth in this sector will be close to the rise in profits for all sectors combined.

We expect the automobiles sector to benefit from higher sales in the US and Southeast Asia. Despite the effect of boycotts of Japanese goods in China triggered by the Senkaku Islands issue, we think growth will be driven by replacement demand in reaction to purchasers holding back in the wake of the financial crisis of 2008. We look for demand in the US to rise 12.4% from 12.8mn vehicles in 2011 to 14.4mn in 2012. In Japan, benefits are emerging from eco-car subsidies and tax breaks.

Meanwhile, we expect a comparatively large contribution to profit growth from the electrical machinery & precision equipment sector on growth in social infrastructure businesses and the smartphone market, as well as the waning impact from the flooding in Thailand. However, business conditions in the consumer electronics subsector remain harsh in FY12, as they were in FY11, and we think companies in this subsector will make a smaller contribution to profit growth than we previously assumed. Among financials, nonlife insurers incurred major losses on natural disasters in FY11, but this factor should have a smaller impact in FY12. Earnings fundamentals have also been improving for megabanks, whose profits have been driven by strong growth in overseas lending. In the transportation sector, marine transportation companies were loss-making in FY11 because of the downturn in shipping rates but should return to profit in FY12 thanks to rate hikes. Telecommunications companies stand to benefit substantially from higher profits from internet services. They have been making steady progress in monetizing internet advertising amid stronger momentum for e-commerce, and have also started to secure gradual sales growth on overseas markets.

In contrast, sectors we see pushing down overall profits include chemicals, trading companies, steel & nonferrous metals and utilities. Earnings deterioration at the first three was largely the result of economic slowdown in FY12 H1, mainly in China. In the trading companies sector and the oil products subsector of the chemicals sectors, we also assume an impact from the WTI crude oil price falling from \$97.30/bbl in FY11 to \$91.40/bbl in FY12. In the utilities sector, while we forecast a decline in the crude oil price, we assume that no nuclear reactors other than the nos. 3 & 4 reactors at the Oi plant will resume operations in FY12, and we project expanded losses on higher fuel costs than in FY11.

Overview of the FY13 corporate earnings outlook

We forecast that recurring profits will grow (or losses will contract) in all 19 sectors in FY13. We look for electrical machinery & precision equipment and automobiles to continue contributing to profit growth, albeit on a smaller scale, and also expect smaller losses for the utilities sector.

We project automobile sales in Japan will fall 7.6% y-y in 2013 to 4.8mn vehicles owing to the withdrawal of eco-car subsidies but think US demand will remain strong, with sales rising 7.3% to 15.4mn vehicles. Earnings recovery at consumer electronics companies accounts for a little over half of the projected contribution to profit growth by the electrical machinery & precision equipment sector. Whether a strong profit growth contribution from the sector as a whole is possible hinges on progress being made in restructuring the consumer electronics subsector in FY12. The projected profit contribution from the utilities sector is largely based on an assumed improvement in the nuclear power capacity factor compared to FY12.

Decrease in profit

Revisions to recurring profit estimates (versus old estimates)

Overview of the FY12 corporate earnings outlook

We have raised our FY12 forecasts for seven of the 19 sectors and lowered them for 12. We made a large upward revision to our forecast for the utilities sector. We also made upward revisions for the financials and housing & real estate sectors, but extremely small ones.

In the utilities sector, H1 earnings exceeded projections by a comparatively large degree owing to declines in crude oil prices, leading to upward revisions to full-year forecasts. However, we still expect ongoing losses owing to the small number of nuclear reactors resuming operations in FY12.

Meanwhile, there were large downward revisions for the electrical machinery & precision equipment, automobiles, trading companies, steel & nonferrous metals, chemicals and machinery sectors, as economic deterioration resulted in downward revisions for many sectors.

In the electrical machinery & precision equipment sector, the downward revision for the consumer electronic subsector increased again. The consumer electronics subsector accounted for ¥560.0bn (roughly two thirds) of the ¥860.4bn downward revision for the sector as a whole. Major companies have come up with various initiatives under new management teams, but the downturn in business conditions has been greater than anticipated, and companies are having to carry out further restructuring, following that in FY11, and post huge restructuring costs. There has been a striking deterioration in the business environment for fields other than consumer electronics too, and there were across-the-board downward revisions for major subsectors, with the smallest of these being for the industrial electronics subsector. This reflects the strong presence of businesses that have supported earnings, such as domestic IT services, thermal power generation, elevator, and domestic infrastructure operations.

The downward revisions for the automobiles sector largely reflect the boycott of Japanese goods in China stemming from the Senkaku Islands dispute. Those for the trading companies, steel & nonferrous metals, chemicals and machinery sectors reflect weak economic conditions in China and other parts of Asia. The Chinese government has been attempting to stimulate the economy via various fiscal and monetary initiatives announced since June 2012, and more macroeconomic indicators point to a bottoming, but partly as a result of structural excess supply remaining, we still take a cautious view from the microeconomic standpoint.

Overview of the FY13 corporate earnings outlook

We have raised our FY13 forecasts for six of 19 sectors and lowered them for 13. Upward and downward revisions for individual sectors are largely in step with revisions to FY12 forecasts. The downward revision for the electrical machinery & precision equipment sector is smaller than for FY12 largely because the latter reflects one-time restructuring costs. The large downward revision for the chemicals sector in FY13, meanwhile, is based on a factor specific to the oil products subsector, which is likely to post comparatively large gains on the sale of assets in FY12.

Fig. 12: Percentage change in quarterly sales and profits

Note: (1) Q1 = Feb-Apr, Mar-May, or Apr-Jun; Q2 = May-Jul, Jun-Aug, or Jul-Sep; Q3 = Aug-Oct, Sep-Nov, or Oct-Dec; Q4 = Nov-Jan, Dec-Feb, or Jan-Mar. (2) Figures are for companies that had announced results (either full-year, Q1, Q2, or Q3) by 25 November 2012. (3) Excludes consolidated subsidiaries. (4) SP = switch to profits; SL = switch to losses; LS = losses shrinking; LI = losses increasing.

What are the Russell/Nomura Japan Equity Indexes?

The Russell/Nomura Japan Equity Indexes are Japanese equity indexes developed jointly by US-based Russell Investments and the Quantitative Research Center, Nomura Securities Co., Ltd.

Russell/Nomura Japan Equity Indexes have the following characteristics:

- They represent the entire Japanese equity market in that component stocks are selected from among all listed stocks.
- They reflect the stocks that are actually available for investment, as stable shareholdings are excluded from market capitalization figures.
- There are sub-indexes for different sizes of company based on market capitalization.
- · There are sub-indexes for growth and value stocks.
- Sub-indexes for growth and value stocks are based on P/B ratios adjusted for unrealized gains/losses on marketable securities and unrecognized retirement benefit obligations.
- The Prime Index consists of the top 1,000 stocks in the Total Market Index by market cap excluding stable shareholdings.
- · Clear definitions mean that there is no arbitrariness in stock-selection methods.
- · The composition of each index is reviewed once a year.

About Russell Investments

Russell Investments is an independent, global financial services firm that provides strategic advice, investment solutions, implementation services and global performance benchmarks that are customized to meet the unique needs of institutional investors, financial advisors and individuals.

Russell has pioneered innovations that have come to define many practices that are standard in the investment world today, and has four decades of experience researching and selecting money managers globally.

Founded in 1936, Russell is headquartered in Seattle, Washington, USA and has offices in Amsterdam, Auckland, Chicago, London, Melbourne, Milan, New York, Paris, San Francisco, Seoul, Singapore, Sydney, Tokyo and Toronto. For more information about how Russell helps to improve financial security for people, visit www.russell.com.

Russell/Nomura Japan Equity Indexes are protected by certain intellectual property rights of Nomura Securities Co., Ltd. and Russell Investments. Nomura Securities Co., Ltd. and Russell Investments do not guarantee the accuracy, completeness, reliability, or usefulness thereof and do not account for business activities and services that any index user and its affiliates undertake with the use of the Indexes.

Any Authors named on this report are Research Analysts unless otherwise indicated

Important Disclosures

Online availability of research and conflict-of-interest disclosures

Nomura research is available on <u>www.nomuranow.com/research</u>, Bloomberg, Capital IQ, Factset, MarkitHub, Reuters and ThomsonOne. Important disclosures may be read at <u>http://go.nomuranow.com/research/globalresearchportal/pages/disclosures/disclosures.aspx</u> or requested from Nomura Securities International, Inc., on 1-877-865-5752. If you have any difficulties with the website, please email <u>grpsupport-</u> <u>eu@nomura.com</u> for help.

The analysts responsible for preparing this report have received compensation based upon various factors including the firm's total revenues, a portion of which is generated by Investment Banking activities. Unless otherwise noted, the non-US analysts listed at the front of this report are not registered/qualified as research analysts under FINRA/NYSE rules, may not be associated persons of NSI, and may not be subject to FINRA Rule 2711 and NYSE Rule 472 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Any authors named in this report are research analysts unless otherwise indicated. *Industry Specialists* identified in some Nomura International plc research reports are employees within the Firm who are responsible for the sales and trading effort in the sector for which they have coverage. Industry Specialists do not contribute in any manner to the content of research reports in which their names appear. *Marketing Analysts* identified in some Nomura research reports are research analysts employed by Nomura International plc who are primarily responsible for marketing Nomura's Equity Research product in the sector for which they have coverage. Marketing Analysts may also contribute to research reports in which their names appear and publish research on their sector.

Distribution of ratings (Global)

The distribution of all ratings published by Nomura Global Equity Research is as follows:

43% have been assigned a Buy rating which, for purposes of mandatory disclosures, are classified as a Buy rating; 40% of companies with this rating are investment banking clients of the Nomura Group*.

45% have been assigned a Neutral rating which, for purposes of mandatory disclosures, is classified as a Hold rating; 46% of companies with this rating are investment banking clients of the Nomura Group*.

12% have been assigned a Reduce rating which, for purposes of mandatory disclosures, are classified as a Sell rating; 22% of companies with this rating are investment banking clients of the Nomura Group*.

As at 30 September 2012. *The Nomura Group as defined in the Disclaimer section at the end of this report.

Explanation of Nomura's equity research rating system in Europe, Middle East and Africa, US and Latin America The rating system is a relative system indicating expected performance against a specific benchmark identified for each individual stock. Analysts may also indicate absolute upside to target price defined as (fair value - current price)/current price, subject to limited management discretion. In most cases, the fair value will equal the analyst's assessment of the current intrinsic fair value of the stock using an appropriate valuation methodology such as discounted cash flow or multiple analysis, etc. **STOCKS**

A rating of 'Buy', indicates that the analyst expects the stock to outperform the Benchmark over the next 12 months. A rating of 'Neutral', indicates that the analyst expects the stock to perform in line with the Benchmark over the next 12 months. A rating of 'Reduce', indicates that the analyst expects the stock to underperform the Benchmark over the next 12 months. A rating of 'Suspended', indicates that the rating, target price and estimates have been suspended temporarily to comply with applicable regulations and/or firm policies in certain circumstances including, but not limited to, when Nomura is acting in an advisory capacity in a merger or strategic transaction involving the company. Benchmarks are as follows: United States/Europe: please see valuation methodologies for explanations of relevant benchmarks for stocks, which can be accessed at: http://go.nomuranow.com/research/globalresearchportal/pages/disclosures/disclosures.aspx; Global Emerging Markets ex-Asia, unless otherwise stated in the valuation methodology. SECTORS

A 'Bullish' stance, indicates that the analyst expects the sector to outperform the Benchmark during the next 12 months. A 'Neutral' stance, indicates that the analyst expects the sector to perform in line with the Benchmark during the next 12 months. A 'Bearish' stance, indicates that the analyst expects the sector to underperform the Benchmark during the next 12 months. Benchmarks are as follows: United States: S&P 500; Europe: Dow Jones STOXX 600; Global Emerging Markets (ex-Asia): MSCI Emerging Markets ex-Asia.

Explanation of Nomura's equity research rating system in Japan and Asia ex-Japan $\ensuremath{\mathsf{STOCKS}}$

Stock recommendations are based on absolute valuation upside (downside), which is defined as (Target Price - Current Price) / Current Price, subject to limited management discretion. In most cases, the Target Price will equal the analyst's 12-month intrinsic valuation of the stock, based on an appropriate valuation methodology such as discounted cash flow, multiple analysis, etc. A '**Buy'** recommendation indicates that potential upside is 15% or more. A '**Neutral'** recommendation indicates that potential upside is less than 15% or downside is less than 5%. A '**Reduce'** recommendation indicates that potential downside is 5% or more. A rating of '**Suspended'** indicates that the rating and target price have been suspended temporarily to comply with applicable regulations and/or firm policies in certain circumstances including when Nomura is acting in an advisory capacity in a merger or strategic transaction involving the subject company. Securities and/or companies that are labelled as '**Not rated'** or shown as '**No rating'** are not in regular research coverage of the Nomura entity identified in the top banner. Investors should not expect continuing or additional information from Nomura relating to such securities and/or companies.

A '**Bullish'** rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a positive absolute recommendation. A '**Neutral'** rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a neutral absolute recommendation. A '**Bearish'** rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a negative absolute recommendation.

Target Price

A Target Price, if discussed, reflect in part the analyst's estimates for the company's earnings. The achievement of any target price may be impeded by general market and macroeconomic trends, and by other risks related to the company or the market, and may not occur if the company's earnings differ from estimates.

Disclaimers

This document contains material that has been prepared by the Nomura entity identified at the top or bottom of page 1 herein, if any, and/or, with the sole or joint contributions of one or more Nomura entities whose employees and their respective affiliations are specified on page 1 herein or identified elsewhere in the document. The term "Nomura Group" used herein refers to Nomura Holdings, Inc. or any of its affiliates or subsidiaries and may refer to one or more Nomura Group companies including: Nomura Securities Co., Ltd. ('NSC') Tokyo, Japan; Nomura International plc ('NIplc'), UK; Nomura Securities International, Inc. ('NSI'), New York, US; Nomura International (Hong Kong) Ltd. ('NIHK'), Hong Kong; Nomura Financial Investment (Korea) Co., Ltd. ('NFIK'), Korea (Information on Nomura analysts registered with the Korea Financial Investment Association ('KOFIA') can be found on the KOFIA Intranet at http://dis.kofia.or.kr); Nomura Singapore Ltd. ('NSL'), Singapore (Registration number 197201440E, regulated by the Monetary Authority of Singapore); Nomura Australia Ltd. ('NAL'), Australia (ABN 48 003 032 513), regulated by the Australian Securities and Investment Commission ('ASIC') and holder of an Australian financial services licence number 246412; P.T. Nomura Indonesia ('PTNI'), Indonesia; Nomura Securities Malaysia Sdn. Bhd. ('NSM'), Malaysia; NIHK, Taipei Branch ('NITB'), Taiwan; Nomura Financial Advisory and Securities (India) Private Limited ('NFASL'), Mumbai, India (Registered Address: Ceejay House, Level 11, Plot F, Shivsagar Estate, Dr. Annie Besant Road, Worli, Mumbai- 400 018, India; Tel: +91 22 4037 4037, Fax: +91 22 4037 4111; SEBI Registration No: BSE INB011299030, NSE INB231299034, INF231299034, INE 231299034, MCX: INE261299034); NIplc, Madrid Branch ('NIplc, Madrid') and NIplc, Italian Branch ('NIplc, Italy'). 'CNS Thailand' next to an analyst's name on the front page of a research report indicates that the analyst is employed by Capital Nomura Securities Public Company Limited ('CNS') to provide research assistance services to NSL under a Research Assistance Agreement. CNS is not a Nomura entity.

Disclaimers required in Japan

Investors in the financial products offered by Nomura Securities may incur fees and commissions specific to those products (for example, transactions involving Japanese equities are subject to a sales commission of up to 1.365% (tax included) of the transaction amount or a commission of ¥2,730 (tax included) for transactions of ¥200,000 or less, while transactions involving investment trusts are subject to various fees, such as commissions at the time of purchase and asset management fees (trust fees), specific to each investment trust). In addition, all products carry the risk of losses owing to price fluctuations or other factors. Fees and risks vary by product. Please thoroughly read the written materials provided, such as documents delivered before making a contract, listed securities documents, or prospectuses.

Transactions involving Japanese equities (including Japanese REITs, Japanese ETFs, and Japanese ETNs) are subject to a sales commission of up to 1.365% (tax included) of the transaction amount (or a commission of ¥2,730 (tax included) for transactions of ¥200,000 or less). When Japanese equities are purchased via OTC transactions (including offerings), only the purchase price shall be paid, with no sales commission charged. However, Nomura Securities may charge a separate fee for OTC transactions, as agreed with the customer. Japanese equities carry the risk of losses owing to price fluctuations. Japanese REITs carry the risk of losses owing to fluctuations in price and/or earnings of underlying real estate. Japanese ETFs carry the risk of losses owing to fluctuations in the underlying indexes or other benchmarks.

Transactions involving foreign equities are subject to a domestic sales commission of up to 0.9975% (tax included) of the transaction amount (which equals the local transaction amount plus local fees and taxes in the case of a purchase or the local transaction amount minus local fees and taxes in the case of a sale) (for transaction amounts of ¥750,000 and below, maximum domestic sales commission is ¥7,455 tax included). Local fees and taxes in foreign financial instruments markets vary by country/territory. When foreign equities are purchased via OTC transactions (including offerings), only the purchase price shall be paid, with no sales commission charged. However, Nomura Securities may charge a separate fee for OTC transactions, as agreed with the customer. Foreign equities carry the risk of losses owing to factors such as price fluctuations and foreign exchange rate fluctuations.

Margin transactions are subject to a sales commission of up to 1.365% (tax included) of the transaction amount (or a commission of ¥2,730 (tax included) for transactions of ¥200,000 or less), as well as management fees and rights handling fees. In addition, long margin transactions are subject to interest on the purchase amount, while short margin transactions are subject to fees for the lending of the shares borrowed. A margin equal to at least 30% of the transaction amount and at least ¥300,000 is required. With margin transactions, an amount up to roughly 3.3x the margin may be traded. Margin transactions therefore carry the risk of losses in excess of the margin owing to share price fluctuations. For details, please thoroughly read the written materials provided, such as listed securities documents or documents delivered before making a contract.

Transactions involving convertible bonds are subject to a sales commission of up to 1.05% (tax included) of the transaction amount (or a commission of ¥4,200 (tax included) if this would be less than ¥4,200). When convertible bonds are purchased via OTC transactions (including offerings), only the purchase price shall be paid, with no sales commission charged. However, Nomura Securities may charge a separate fee for OTC transactions, as agreed with the customer. Convertible bonds carry the risk of losses owing to factors such as interest rate fluctuations and price fluctuations in the underlying stock. In addition, convertible bonds denominated in foreign currencies also carry the risk of losses owing to factors such as foreign exchange rate fluctuations.

When bonds are purchased via public offerings, secondary distributions, or other OTC transactions with Nomura Securities, only the purchase price shall be paid, with no sales commission charged. Bonds carry the risk of losses, as prices fluctuate in line with changes in market interest

rates. Bond prices may also fall below the invested principal as a result of such factors as changes in the management and financial circumstances of the issuer, or changes in third-party valuations of the bond in question. In addition, foreign currency-denominated bonds also carry the risk of losses owing to factors such as foreign exchange rate fluctuations.

When Japanese government bonds (JGBs) for individual investors are purchased via public offerings, only the purchase price shall be paid, with no sales commission charged. As a rule, JGBs for individual investors may not be sold in the first 12 months after issuance. When JGBs for individual investors are sold before maturity, an amount calculated via the following formula will be subtracted from the par value of the bond plus accrued interest: (1) for 10-year variable rate bonds, an amount equal to the two preceding coupon payments (before tax) x 0.8 will be used through 9 January 2013, and an amount equal to the two preceding coupon payments (before tax) x 0.79685 will be used starting on 10 January 2013, (2) for 5-year and 3-year fixed rate bonds, an amount equal to the two preceding coupon payments (before tax) x 0.8 will be used through 9 January 2013, and an amount equal to the two preceding coupon payments (before tax) x 0.79685 will be used starting on 10 January 2013, and an amount equal to the two preceding coupon payments (before tax) x 0.79685 will be used starting on 10 January 2013.

Purchases of investment trusts (and sales of some investment trusts) are subject to a purchase or sales fee of up to 5.25% (tax included) of the transaction amount. Also, a direct cost that may be incurred when selling investment trusts is a fee of up to 2.0% of the unit price at the time of redemption. Indirect costs that may be incurred during the course of holding investment trusts include, for domestic investment trusts, an asset management fee (trust fee) of up to 5.25% (tax included, annualized basis) of the net assets in trust, as well as fees based on investment performance. Other indirect costs may also be incurred. For foreign investment trusts, indirect fees may be incurred during the course of holding such as investment company compensation.

Investment trusts invest mainly in securities such as Japanese and foreign equities and bonds, whose prices fluctuate. Investment trust unit prices fluctuate owing to price fluctuations in the underlying assets and to foreign exchange rate fluctuations. As such, investment trusts carry the risk of losses. Fees and risks vary by investment trust. Maximum applicable fees are subject to change; please thoroughly read the written materials provided, such as prospectuses or documents delivered before making a contract.

An annual account maintenance fee of up to ¥1,575 (tax included) is charged for any account held with Nomura Securities containing equities or investment securities. An additional annual account maintenance fee of up to ¥3,150 (tax included) is charged for any account containing foreign securities. No account fee will be charged for other marketable securities or monies deposited. Transfers of equities to another securities company via the Japan Securities Depository Center are subject to a transfer fee of up to ¥10,500 (tax included) per issue transferred depending on volume.

Nomura Securities Co., Ltd.

Financial instruments firm registered with the Kanto Local Finance Bureau (registration No. 142)

Member associations: Japan Securities Dealers Association; Japan Investment Advisers Association; The Financial Futures Association of Japan; and Type II Financial Instruments Firms Association.
