(1) Net inflows of recurring revenue assets are defined and calculated by subtracting the amount of sell-offs and outflows from the amount of purchase and inflows of recurring revenue assets, and is an index used to measure the expansion of recurring revenue assets excluding changes in market value. The definition has been revised retroactively to exclude outflows from investment trust distributions. The figures prior to the year ended March 31, 2025 have been reclassified following this change in definition of net inflows of recurring assets. As a result, the net inflows of recurring revenue assets for the year ended March 31, 2024 have increased from ¥317.4 billion to ¥701.9 billion.

(2) "Services for salaried employees," one of the KPIs of the Wealth Management Division, has been renamed "Workplace services," effective April 1, 2024. There have been no changes to the definition or calculation of this KPI.
