Directors' report

Year ended 31 March 2022

TO OUR SHAREHOLDERS

While this year 2022 has begun with uncertainties triggered by the direct and indirect consequences of the military conflict at the borders of the European Union, the COVID-19 pandemic situation continued to affect our business environment and our lives during the past year.

Driven by its *raison d'être* to provide reliable and best in class quality services to its clients, Nomura Bank (Luxembourg) S.A. (NBL or the Bank) has, once again, demonstrated the resilience of its operating platform supported by the unique and unwavering commitment of its people to efficiently steer the company through such a challenging landscape.

Besides the robust financial performance we delivered during the past year that has been supported by the continued and invaluable loyalty of our clients in our capabilities to craft customized business solutions and deliver excellence when it comes to execution, we have actioned core components of our Business Strategy to further adapt ourselves on the long-run to their evolving expectations.

We have progressed on the execution of our client centric strategic initiatives as planned and we have intensified our daily dialogue with our customers to grasp and promptly react to their additional servicing needs. We understood our clients' challenges in relation to data availability and reporting flexibility which are at the forefront of their, and our, preoccupations. We subsequently managed to develop meaningful and aligned add-ons to our offering that we are committed to enrich accordingly.

Conscious that our quality and zero default distinctive feature is crucial for our clients, we relentlessly delivered on the enhancement of our operational risk management framework to achieve even greater in that field to ensure the utmost possible quality of our deliveries.

Business profile

Our client-centric approach, demonstrated integrity and the expertise of our 295 partners (as at 31 March 2022) supported the growth of our market share and revenues. In that regard, we consider the combination of a reliable technology with the diversity of our people and the constant evolution of their skillset to the market evolution and fundamental expectations of our clients as our key differentiator. We continuously invest in our people through targeted and business aligned training programs to fuel innovation and retain our expertise.

As it relates to Assets under Administration (AuA), we benefited from the combination between additional Institutional investors' inflows and the progressive recovery of the financial markets from the adverse impacts triggered by the pandemic. Those AuA rose by 10% during the past fiscal year to end up at USD 55,4 billion as of 31 March 2022 (compared to USD 50,2 billion a year ago).

From a geographical repartition perspective, the domicile split between the 268 serviced investment funds remained rather steady with a 81/19 ratio of the AuA respectively pertaining to serviced Cayman and Luxembourg based investment vehicles.

Financial performance highlights

On the revenues side, our core asset servicing activities (custody and fund administration business lines), boosted by the increase of the serviced Assets, generated EUR 40 million in fees (which represents an Year-on-Year increase of 7%) while, in turn, our capital markets activities generated robust revenues of EUR 24 million (compared to EUR 20 million a year ago).

Combination between the aforesaid revenues increase and our efforts in the field of operational effectiveness contributed to a noticeable increase of NBL's profit before tax for the fiscal year from EUR 15,1 million a year ago to EUR 24,2 million.

In turn, the profit for the year amounted to EUR 18,2 million (compared to EUR 11,6 million a year ago).

The Bank's balance sheet remained strong from a liquidity and capital perspective and it totaled EUR 4.858 million as of 31 March 2022 (compared to EUR 3.251 million as of 31 March 2021) while shareholders' equity amounted to EUR 359 million as of 31 March 2022 (EUR 354 million as of 31 March 2021). In that respect, we refer to Note 39 for the proposed allocation of the profit for the year.

From a Corporate structure perspective, NBL has neither bought its own shares nor created any branches or subsidiaries during the period. Moreover, there are no post-balance sheet events to report that would affect the financial results for the year ended 31 March 2022 or that would otherwise require a disclosure in the notes to the financial statements.

Synergies: our Luxembourg subsidiary

Global Funds Management S.A. (GFM), our wholly owned Luxembourg Super Management Company, is continuously adapting itself to meet its clients' needs and further develop its products and asset classes servicing capabilities.

GFM is a licensed UCITS Management Company, Manager of Money Market Funds and an Alternative Investment Fund Manager covering a broad range of strategies including the management of vehicles directly or indirectly exposed to private equities, real estate and infrastructure assets.

As part of its Strategy, GFM continues to focus on the alignment of its operating capabilities to the specificities of the aforementioned asset classes. Even though GFM offers an open business infrastructure to its clients independently of its parent NBL, both companies are lined up in terms of Business strategies to support clients in the deployment of low-liquidity investment strategies. Together, we offer a comprehensive and exceptional Luxembourg one-stop solution under Nomura's global franchise.

GFM is in position to offer to its existing and third-party clients with the broadest range of Luxembourg's investment fund solutions and product regimes which aim to provide comprehensive investor protection through strong governance and substance requirements.

Supported by the establishment of new investment funds, GFM's assets under management grew by 1% compared to the previous year figures (as at 31 March 2022). These new investment funds' creation, especially in the alternative investment space, enable a further diversification of the revenue stream and an increased resilience of the company income stream to adverse investment environment as it could be witnessed during the last quarter of the concerned fiscal year.

Service Organisation Control Report

In order to demonstrate the effectiveness of the control environment in place to oversee its operations to its existing and potential clients, NBL has mandated Ernst & Young to issue a combined ISAE 3402 / U.S. AT section 801 report for the fiscal year ended 31 March 2022, our seventh Service Organisation Control report.

Risk management and financial soundness

NBL regards risk excellence as a key pillar of its financial stability and feels, in that regard, accountable towards its clients and shareholders. Aligned with the sound risk culture advanced by Nomura Group we are constantly enhancing our corporate governance in all its components and hereby represent that we have proportionate internal resources and

effective governance bodies in place to unceasingly identify, monitor and mitigate the whole range of evolving risks to which we are exposed.

With respect to arising risks, NBL is mindful of the increasing protean cyber threats to which it is exposed and we have invested a commensurate amount of financial and human resources to keep abreast with the latest technological evolutions and regulatory expectations. We aim at offering the best in class protection of the integrity of our environment to ultimately ensure the continuity of the services to our clients' assets that we safeguard and grow, this is one of our core duties and a priority for us.

Once again, NBL can demonstrate the soundness of its capital and liquidity related risk components:

- Bank's solvency ratio stands at 20.14% as at 31 March 2022 (compared to 38.39% a year ago) which remains significantly above the regulatory requirement which illustrates the soundness of NBL's Tier 1 capital. In that regard, our eligible own funds amounted to EUR 318,086,040 as at 31 March 2022.
- The Liquidity Coverage Ratio requirement is being met with a ratio of 146.67% as at 31 March 2022 (compared to 163.79% at the end of the previous fiscal year).

In accordance with its obligations as set forth by the relevant regulatory instruments and as per Nomura Group Risk framework, we have performed our internal capital and liquidity adequacy assessment process and developed capital forecasts over a three-year period. The exercise included stress tests analysis of all the material risk universes. Accordingly, we represent that NBL continues to be adequately capitalised and that its liquidity situation is adequately monitored and managed, in line with the overarching principles of serving its clients' liquidity and ensuring the Bank's long-term viability. Additionally, it is foreseen that even in the consideration of the most adverse scenario the Bank will remain profitable over the next three years.

We refer to Note 32 for further details on Risk Management.

Regulatory compliance

Lifted by our values of integrity and expertise, we unremittingly invest in regulatory compliance.

Aligned with one of our founding principles of staying one-step ahead, anticipating and addressing in a fashion the changes affecting the complex regulatory environment under which NBL and its Affiliates operate is a vital priority for us. As such, we remain abreast of these changes and concurrently support our clients in leveraging connected business opportunities that may arise.

To support the effective handling of those changes, NBL leverages its dedicated regulatory changes management's body coordinated by its Compliance function who oversees the timely execution of related action plans. Thanks to the scrutinized setup, NBL has the means in place to line up all relevant stakeholders across the board while supporting regulatory awareness of its people.

It is worth to emphasize that NBL and its Affiliates are represented in different Industry Associations at Luxembourg (notably the ABBL, ALFI, ALCO, ALRiM) and European levels (the EFAMA for instance) while we also have regular recourse to other Nomura Group entities for sharing of best practices and joining forces.

During the past year, we notably focused on the implementation of the necessary means to address our obligations as laid down by the Securities Financing Transactions Regulation, Shareholders Rights Directive II, Central Securities Depositories Regulation, Sustainable Finance Disclosure Regulation and EU Taxonomy Regulation. Additionally we continued to address

ongoing regulatory developments in light of Outsourcing, Remuneration framework, Tax Compliance and MiFID II for instance.

On the Anti-Money Laundering and International Sanctions front, in February 2022, a number of countries (including the US, UK and EU) imposed new sanctions against certain entities (of which financial institutions) and individuals in Russia as a result of the official recognition of the Donetsk People Republic and Lugansk People Republic by the Russian Federation. Those sanctions were supplemented by additional ones following military operations initiated by Russia on 24 February 2022 against Ukraine including the restriction of the access of already sanctioned Russian banks to the international payments system SWIFT.

In accordance with the aforementioned sanctions, NBL has put in place all the necessary means to address its regulatory obligations towards both serviced funds' investments and investors. Additionally, conscious that the results of the sanctions and geopolitical instability have created an important volatility in the financial markets with a potential to adversely impact global economies and increase instability across markets, we have tabled those elements as part of our financial projections with no material impact to highlight given our particularly limited exposures.

Moving forward together: Our unwavering commitment to service excellence

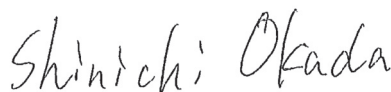

Although, we begun this Report in a challenging environment, we look to the next fiscal year and beyond with confidence in the demonstrated soundness and sustainability of our business model and are determined to continuously partner with our clients to put in motion effective and specially crafted solutions. As such, we will continue delivering the premium we owe to our clients while managing our risks in a responsible manner.

On the mid-term, in accordance with our plans, we will relentlessly execute our strategic initiatives with a special emphasis on two pillars surrounding sustainability and private Markets.

Gratitude

We want to close by expressing our deepest gratitude to our clients for the trust they place in NBL and look forward to continuing to support their growth in the years ahead.

Report on the audit of the Financial Statements

Opinion

We have audited the Financial Statements of Nomura Bank (Luxembourg) S.A. (the "Bank"), which comprise the statement of financial position as at 31 March 2022, and the income statement, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and the notes to the Financial Statements, including a summary of significant accounting policies.

In our opinion, the accompanying Financial Statements give a true and fair view of the financial position of the Bank as at 31 March 2022, and of its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Basis for opinion

We conducted our audit in accordance with EU Regulation N° 537/2014, the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the EU Regulation N° 537/2014, the Law of 23 July 2016 and ISAs are further described in the "Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Financial Statements of the current period. These matters were addressed in the context of the audit of the Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Completeness and valuation of provisions for operational risk linked to the investment funds-related activities (including Fund Administration, Transfer Agent and Custodian activities)

Description

Operational risk mainly relates to errors that could occur through the day to day execution of transactions and performance of services to customers, including inter alia the execution of transactions on behalf of customers, of subscriptions and redemptions of investors in the investment funds, the identification of corporate actions, the periodic calculation of the Net Assets Value (NAV) of the investment funds, the monitoring of investment restrictions compliance as well as the safekeeping of the customers' assets.

The Bank is subject to operational risk in relation with the above mentioned activities and we consider this as a key audit matter as the Bank is executing a high volume of transactions and operations of significant amounts on behalf of customers, and operational errors could lead to significant operational losses, to breaches of regulatory obligations and thus impact the reputation of the Bank.

As at 31 March 2022, the Bank has not recorded any provision for operational risk since it is not aware of any operational errors which would require a provision. Gains and losses resulting from operational errors are recorded respectively in the captions “Other operating income” and “Other operating expenses”.

For the year ended 31 March 2022, net losses from operational errors amount to EUR 44,681.

See Note 32 (g) to the Financial Statements for more information on operational risk.

How the matter was addressed in our audit

We assessed and tested the design and operating effectiveness of the key controls implemented by the Bank over the execution of transactions, the calculation of the Net Assets Value, the monitoring of investment restrictions and the safekeeping of the customers’ assets.

We performed the following main procedures:

- We reviewed the Service Organization Control Report (ISAE 3402) covering the Global Custody, Fund Accounting, Transfer Agency and Information Technology activities for the period from 1 April 2021 to 31 March 2022 issued by Ernst & Young Luxembourg and assessed the appropriateness of the controls’ descriptions and the outcome of the testing of the effectiveness of such controls on operational risks;
- We tested the design and operating effectiveness of the relevant IT General Controls implemented by the Bank (access management, change management, proper segregation of duties);
- We obtained an understanding of the operational risk monitoring procedures and tested how identified operational losses and gains that occurred from 1 April 2021 to 31 March 2022 have been monitored and reported to the Management;
- We obtained the incident reports and checked the completeness of such reports. We also checked that each incident has been carefully analyzed and that a financial impact has been determined by the Bank;
- We assessed the analysis performed by the Bank and checked that operational gains or losses determined by the Bank have been adequately recorded in the Financial Statements;
- We obtained and assessed the reports issued by Internal Audit, Compliance and Risk Management and the issues identified in these reports as well as the key risk indicators implemented to monitor the Bank’s activities;
- We obtained and assessed the reports sent to the Management that we considered relevant for audit purposes;
- We read the correspondence between the Bank and the CSSF;
- We obtained the list of all the existing claims and litigations and assessed the related risks and potential financial impacts;
- We obtained and assessed the answers received from all lawyers of the Bank further to our confirmation requests;
- We assessed the level of provisions for operational errors recorded by the Bank as at 31 March 2022 as well as the movements during the year then ended;
- In the context of our procedures on subsequent events, we ensured that no operational error has been identified after 31 March 2022 which would require an adjustment of the financial statements as of 31 March 2022.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the Directors' report but does not include the Financial Statements and our report of "Réviseur d'Entreprises Agréé" thereon.

Our opinion on the Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Financial Statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the Financial Statements

The Board of Directors is responsible for the preparation and fair presentation of the Financial Statements in accordance with IFRS as adopted by the European Union, and for such internal control as the Board of Directors determines is necessary to enable the preparation of Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, the Board of Directors is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'Entreprises Agréé" for the audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "Réviseur d'Entreprises Agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with EU Regulation N° 537/2014, the Law of 23 July 2016 and with the ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control;

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors;
- Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "Réviseur d'Entreprises Agréé" to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "Réviseur d'Entreprises Agréé". However, future events or conditions may cause the Bank to cease to continue as a going concern;
- Evaluate the overall presentation, structure and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

Report on other legal and regulatory requirements

We have been appointed as "Réviseur d'Entreprises Agréé" by the Board of Directors on 9 June 2021 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 19 years.

The Directors' report, which is the responsibility of the Board of Directors, is consistent with the Financial Statements and has been prepared in accordance with applicable legal requirements.

We confirm that the prohibited non-audit services referred to in EU Regulation N° 537/2014 were not provided and that we remained independent of the Bank in conducting the audit.

Ernst & Young

Statement of cash flows

For the year ended 31 March 2022
(expressed in EUR)

	31 March 2022	31 March 2021
Profit/(Loss) before tax	24,166,130	15,128,707
Adjustments:		
Amortisation of tangible and intangible assets (Note 28)	3,639,778	3,682,673
Fair value adjustments and other adjustments	14,550,240	(12,018,741)
Cash flows from operating profits before changes in operating assets and liabilities	42,356,148	6,792,639
Net (increase)/decrease in loans and advances to credit institutions *	(65,194,789)	(153,656,062)
Net (increase)/decrease in loans and advances to customers	(310,025,850)	163,119,903
Net (increase)/decrease in financial assets at fair value through OCI	---	---
Net (increase)/decrease in financial assets mandatorily at FVTPL	(718,513,014)	231,368,601
Net (increase)/decrease in other assets	459,821	3,268,614
Net increase/(decrease) in amounts due to credit institutions	24,662,130	(5,815,778)
Net increase/(decrease) in amounts due to customers	1,254,300,791	(228,187,716)
Net increase/(decrease) in other financial liabilities (excl. IFRS 16)	25,624,153	(12,760,374)
Net increase/(decrease) in other financial liabilities at FVTPL (Note 33)	(1,514,206)	(19,264,300)
Net increase/(decrease) in other liabilities	1,779,091	(431,963)
Income tax paid	---	(373,596)
Net variations in other operating assets/liabilities	(12,853,803)	2,352,702
Net cash flows from operating activities	241,080,472	(13,587,330)
Acquisition of intangible/ tangible assets (Note 9)	(1,653,082)	(1,036,998)
Net cash flows from investing activities	(1,653,082)	(1,036,998)
Net increase/(decrease) in cash and cash equivalents	239,427,390	(14,624,328)
Cash and cash equivalents at the beginning of the year	1,713,434,515	1,728,058,843
Net increase/(decrease) in cash and cash equivalents	239,427,390	(14,624,328)
Cash and cash equivalents at the end of the year	1,952,861,905	1,713,434,515
<i>of which: not available</i>	<i>33,739,497</i>	<i>26,446,867</i>

For the purposes of the statement of cash flows, cash and cash equivalents comprise the following balances with less than three months maturity from the date of acquisition:

	31 March 2022	31 March 2021
Cash, cash balances at central banks and other demand deposits (Note 4)	765,976,714	1,133,856,513
Loans and advances to credit institutions	1,186,885,191	579,578,002
repayable with less or three months maturity from the date of acquisition	1,186,885,191	579,578,002
Cash and cash equivalents	1,952,861,905	1,713,434,515

(*) Excluding amounts of loans and advances to credit institutions which are part of cash and cash equivalent disclosed here below,

The accompanying notes form an integral part of these Financial Statements.

The background of the entire page is a photograph of a traditional Japanese red wooden bridge, likely the Shinkyo Bridge in Kyoto, spanning a pond. The bridge has a curved wooden deck and bright red railings. In the foreground on the right, a red pillar with a black finial is visible, featuring vertical Japanese text. The bridge is surrounded by lush green trees and numerous cherry blossom trees in full bloom, with pink blossoms framing the top and sides of the scene. A semi-transparent white box in the upper left contains the title text.

Notes to the Financial Statements

As of 31 March 2022

NOTE 1 - CORPORATE INFORMATION

Corporate matters

Nomura Bank (Luxembourg) S.A. (the “Bank” or “NBL”) was incorporated in Luxembourg on 2 February 1990 as a Société Anonyme.

Nature of the Bank’s business

The object of the Bank is to undertake all banking, financial securities and fiduciary operations and to engage in leasing and factoring activities for its own account or for account of its customers.

The Bank can establish or take part in finance and other companies or acquire, encumber or dispose of real estate for its own or for account of its customers.

A significant volume of the Bank’s transactions is concluded directly with companies of the Nomura Group or with their Japanese clients.

Financial Statements

The Bank’s accounting year ends on 31 March of each year. The Financial Statements were authorized for issue by the Bank’s Board of Directors on 8 June 2022.

Parent undertaking

The Bank is a subsidiary of Nomura Europe Holdings Plc (the “Parent company”), a holding company incorporated under the laws of United Kingdom and whose registered office is in London. The consolidated accounts of Nomura Europe Holdings Plc may be obtained at 1 Angel Lane, London, EC4R 3AB, UK.

The Bank’s ultimate parent is Nomura Holdings, Inc., a holding company incorporated under the laws of Japan whose registered office is in Tokyo. The consolidated accounts of Nomura Holdings, Inc. may be obtained at 1-13-1, Nihonbashi, Chuoku, Tokyo 103-8645, Japan.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

The Financial Statements are prepared on the historical cost basis except for derivatives held for trading, hold to collect and sell, financial assets and debt certificates designated at fair value through profit or loss which are measured at fair value.

Statement of compliance

The Financial Statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and the relative interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”) as adopted for use in the European Union.

The preparation of Financial Statements in accordance with IFRS requires the Board of Directors to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expense items. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Judgments made by the Board of Directors in the application of IFRS that have significant effect on the Financial Statements and estimates with a significant risk of material adjustments in the next year are developed in Note 3.

Changes in accounting policies

The accounting policies adopted are consistent with those of the previous year, except for the following amendments to IFRS effective as of 1 January 2021 (for the avoidance of doubt, only the new standards, amendments to standards and IFRIC which may have an effect on the Bank's Financial Statements are mentioned below). The Bank has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

IASB and IFRIC texts endorsed by the European Union and applied as from 1 January 2021

- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 Interest Rate Benchmark Reform – Phase 2;
- Amendments to IFRS 4 Insurance Contracts – deferral of IFRS19;
- Amendments to IFRS 16 Leases: Covid-19-Related Rent Concessions beyond 30 June 2021.

The Bank has considered the above-mentioned amendments and standards but has come to the conclusion that they do not affect its financial situation.

Standards issued but not yet effective

The following IFRS standards and IFRIC interpretations were issued with an effective date for financial periods beginning on or after 1 January 2021. The Bank has chosen not to early adopt these standards and interpretations before their effective dates. The Bank having its end of fiscal year on 31 March the applicable date for these standards is 1 April 2021.

Only accounting policies and disclosures applicable or potentially applicable to the Bank are mentioned below.

IASB and IFRIC texts endorsed by the European Union during the current period but not yet applicable as from 1 January 2021

- Amendments to IFRS 3 Business Combinations; IAS 16 Property, Plant and Equipment; IAS 37 Provisions, Contingent Liabilities and Contingent Assets; and Annual Improvements 2018-2020.

IFRS and IFRIC texts issued during previous periods and neither endorsed by the European Union nor applicable as at 1 January 2021

- IFRS 17 Insurance Contracts (issued on 18 May 2017); including Amendments to IFRS 17;
- Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2: Disclosure of Accounting policies;
- Amendments to IAS 8 Accounting policies, Changes in Accounting Estimates and Errors: Definition of Accounting Estimates;
- Amendments to IAS 12 Presentation of Financial Statements: Classification of Liabilities as Current or Non-current and Classification of Liabilities as Current or Non-current - Deferral of Effective Date;

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

■ Amendments to IAS 12 Income Taxes: Deferred Tax related to Assets and Liabilities arising from a Single Transaction.

The Bank has considered the above-mentioned amendments and standards but does not foresee any significant impact on its financial situation.

Exemption from preparing consolidated accounts

These Financial Statements are prepared on a stand-alone basis.

According to the current Luxembourg regulation, the Bank is exempt from the requirement to publish consolidated accounts and a consolidated management report.

(a) Foreign currency translation

The Financial Statements are presented in Euro ("EUR"), which is also the Bank's functional currency.

Transactions in foreign currencies are initially recorded at the functional currency rate of exchange ruling at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency exchange rates prevailing at the reporting date. All differences arising on non-trading activities are taken to "Foreign exchange differences" in the income statement.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

The main exchange rates used as of 31 March 2022 and 2021 are as follows:

	31 March 2022	31 March 2021
EUR/USD	1,116	1,170
EUR/JPY	136,503	129,774

(b) Financial assets classification and measurement

Financial assets classification and measurement are based on both the business model for managing the financial assets and the contractual cash flow characteristics of the financial assets. These factors determine whether the financial assets are measured at amortised cost, fair value through other comprehensive income ("FVOCI"), or fair value through profit or loss ("FVTPL").

All debt instrument financial assets, including loans, that do not meet a solely payment of principal and interest ("SPPI") condition, including those that contain embedded derivatives, are classified as mandatorily measured at fair value through profit or loss. For those that meet the SPPI condition, classification at initial recognition is determined based on the business model under which these financial assets are managed.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

(c) Financial liabilities

Financial liabilities are measured at amortised cost except those designated at fair-value (fair-value option). The Bank has decided to use the fair value option to measure the debt certificates issued under a medium-term notes program due to their embedded derivatives.

(d) Financial instruments – initial recognition and subsequent measurement

(i) Date of recognition

All financial assets and liabilities are initially recognised on the value date. This includes purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the marketplace.

(ii) Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on the purpose and the management's intention for which the financial instruments were acquired and their characteristics.

All financial instruments are measured initially at their fair value plus transaction costs, except in the case of financial assets and financial liabilities recorded at fair value through profit or loss.

(iii) Derivatives held for trading

Derivatives held for trading are recorded in the statement of financial position at fair value. Changes in fair value are recognised in "Net (un) realised gains (losses) on financial assets and liabilities held for trading". Interest income or expense is recorded in "Net interest income" according to the terms of the contract, or when the right to the payment has been established.

(iv) Hedging derivatives

The Bank may use derivative financial instruments to hedge its exposure to foreign exchange and interest rate risks arising from operational, financing and investment activities.

The treatment of any resulting gains and losses is set out below.

A hedging relationship exists when:

- At the inception of the hedge there is formal documentation of the hedge;
- The hedge is expected to be highly effective throughout the period and prospectively;
- The effectiveness of the hedge can be reliably measured;
- For hedges of a forecasted transaction, the transaction is highly probable and presents an exposure to variations in cash flows that could ultimately affect net profit or loss.

(v) Financial liabilities designated at fair value through profit or loss

Financial liabilities classified in this category are those that have been designated by management on initial recognition. Management may only designate an instrument at fair value through profit or loss upon initial recognition when the following criteria are met, and designation is determined on an instrument by instrument basis:

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

- The designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the liabilities or recognising gains or losses on them on a different basis; or
- The liabilities are part of a group of financial liabilities which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy; or
- The financial instrument contains one or more embedded derivatives which significantly modify the cash flows that otherwise would be required by the contract.

Financial liabilities at fair value through profit or loss are recorded in the statement of financial position at fair value. Changes in fair value are recorded in “Net (un) realised gains (losses) on financial assets and liabilities designated at fair value through profit or loss” in the income statement.

As of 31 March 2021, included in this category are structured medium term notes issued by the Bank which contain embedded derivatives not separately recorded. These financial instruments are not listed on an active market (see Note 12). As of 31 March 2021, all those notes have matured.

(vi) *Loans and advances*

Under IFRS 9, loans and advances follow the business model “Held To Collect” cash flows. Therefore, they are valued at amortised cost and subjected to the ECL calculation.

(e) **Derecognition of financial assets and financial liabilities**

(i) *Financial assets*

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired; or
- The Bank has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a “pass-through” arrangement; and either:
 - The Bank has transferred substantially all the risks and rewards of the asset; or
 - The Bank has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Bank has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Bank’s continuing involvement in the asset. In that case, the Bank also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Bank could be required to repay.

(ii) *Financial liabilities*

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the income statement.

(f) Reverse repurchase agreements

Securities purchased under agreements to resell at a specified future date are not recognised in the statement of financial position. The consideration paid, including accrued interest, is recorded in the statement of financial position reflecting the transaction's economic substance as a loan by the Bank. The difference between the purchase and resale prices is recorded in the caption "Net interest income" and is accrued over the life of the agreement using the effective interest rate ("EIR").

(g) Determination of fair value

The fair value for financial instruments traded in active markets is based on their quoted market price or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

For all other financial instruments not traded in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include the discounted cash flow method, comparison to similar instruments for which market observable prices exist, options pricing models, credit models and other relevant valuation models.

Certain financial instruments are recorded at fair value using valuation techniques in which current market transactions or observable market data are not available. Their fair value is determined using a valuation model that has been tested against prices or inputs to actual market transactions and using the Bank's best estimate of the most appropriate model assumptions. Models are adjusted to reflect the spread for bid and ask prices to reflect costs to close out positions, counterparty credit and liquidity spread and limitations in the models.

Also, profit or loss calculated when such financial instruments are first recorded ("Day 1" profit or loss) is deferred and recognised only when the inputs become observable or on derecognition of the instrument.

An analysis of fair values of financial instruments and further details as to how they are measured are provided in Note 33.

(h) Impairment of financial assets

IFRS 9 has introduced a new impairment model based on Expected Credit Loss ("ECL").

The expected credit loss model requires the recognition of impairment at an amount equal to the probability-weighted 12-month ECL or lifetime ECL depending on whether there has been a significant increase in credit risk since initial recognition of the financial instrument. If a significant increase in credit risk has occurred since initial recognition, then impairment is measured as lifetime ECL otherwise 12-month ECL are measured, which represent the portion of lifetime ECL that are expected to occur based on default events that are possible within 12 months after the reporting date.

Evidence of impairment could include indications that the borrower or a group of borrowers was experiencing significant financial difficulty, the probability that they would enter bankruptcy or other financial reorganisation, default or delinquency in interest or principal payments and where observable data indicated that there was a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlated with defaults.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

(i) *Financial assets carried at amortised cost*

For financial assets carried at amortised cost, the Bank first assesses individually whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be recognised, are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the income statement. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of "Interest and similar income". Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Bank.

If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to the income statement.

The present value of the estimated future cash flows is discounted at the financial asset's original EIR. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current EIR. The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of the Bank's internal credit grading assessment.

Future cash flows on a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with credit risk characteristics similar to those in the group.

Historical loss experience, if any, is adjusted on the basis of current observable data to reflect the effects of current conditions on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not exist currently. Estimates of changes in future cash flows reflect, and are directionally consistent with, changes in related observable data from year to year (such as changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses in the group and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

(i) **Offsetting financial instruments**

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

net basis, or to realise the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, therefore, the related assets and liabilities are presented gross in the statement of financial position.

(j) Recognition of income and expenses

Revenue recognition under IFRS 15 is applied using a five-step model:

1. Identify the contract(s) with a customer;
2. Identify the performance obligations in the contract;
3. Determine the transaction price;
4. Allocate the transaction price to the performance obligation in the contract;
5. Recognise revenue when (or as) the entity satisfies a performance obligation.

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

(i) Interest and similar income and expenses

For all financial instruments measured at amortised cost and financial instruments designated at fair value through profit or loss, interest income or expense is recorded using the effective interest rate ("EIR"), which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the EIR, but not future credit losses. The carrying amount of the financial asset or financial liability is adjusted if the Bank revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original EIR and the change in carrying amount is recorded as "Other operating income".

Once the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

(ii) Fee and commission income

The Bank earns fee and commission income from a diverse range of services it provides to its customers. Fee income has to be divided into the following two categories:

Fee income earned from services that are provided over a certain period of time

Fees earned for the provision of services over a period of time are accrued over that period. These fees include commission income and asset management, custody and other management and advisory fees.

Loan commitment fees for loans that are likely to be drawn down and other credit related fees, if any, are deferred (together with any incremental costs) and recognised as an adjustment to the EIR on the loan. When it is unlikely that a loan be drawn down, the loan commitment fees are recognised over the commitment period on a straight-line basis.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

Fee income from providing transaction services

Fees arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses, if any, are recognised on completion of the underlying transaction. Fees or components of fees that are linked to a certain performance are recognised after fulfilling the corresponding criteria.

(iii) Dividend income

Dividend income is recognised when the Bank's right to receive the payment is established.

(k) Cash and cash equivalents

Cash and cash equivalents as referred to in the statement of cash flows comprises cash on hand, current accounts with central banks and amounts due from banks on demand or with an original maturity of three months or less.

(l) Tangible assets

Tangible assets are stated at cost excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment in value. Changes in the expected useful life are accounted for by changing the amortisation period or method, as appropriate, and treated as changes in accounting estimates.

Depreciation is calculated using the straight-line method to write down the cost of tangible assets to their residual values over their estimated useful lives. Land is not depreciated. The estimated useful lives are as follows:

- Computer hardware: 3 to 5 years;
- Other fixtures and fittings, tools and equipment: 5 years.

Tangible assets are derecognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in the caption "Other operating income/expenses" in the income statement in the year the asset is derecognised.

Under IFRS 16, the Bank recognises a right-of-use ("ROU") asset and a lease liability at commencement for all leases, except for short-term leases and leases of low values.

(m) Intangible assets

The Bank's intangible assets include the value of computer software and licenses. An intangible asset is recognised only when its cost can be measured reliably, and it is probable that the expected future economic benefits that are attributable to it will flow to the Bank.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

Development expenditures on an individual project are recognised as an intangible asset when the Bank can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale;
- Its intention to complete and its ability and intention to use or sell the asset;

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

- How the asset will generate future economic benefits;
- The availability of resources to complete the asset;
- The ability to measure reliably the expenditure during development.

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete, and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation is recorded in cost of sales. During the period of development, the asset is tested for impairment annually.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, and treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the income statement in the expense category consistent with the function of the intangible asset.

Amortisation is calculated using the straight-line method to write down the cost of intangible assets to their residual values over their estimated useful lives as follows:

- Computer software and licenses: 3 to 5 years.

(n) Impairment of non-financial assets

The carrying amounts of the Bank's assets, except deferred income tax assets and financial assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in the income statement. The recoverable amount of other assets is the greater of their net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

(o) Financial guarantees

In the ordinary course of business, the Bank gives financial guarantees, consisting of letters of credit, guarantees and acceptances. Financial guarantees are initially recognised in the financial statements (within "Other liabilities") at fair value, being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amount initially recognised less, when appropriate, cumulative amortisation recognised in the income statement, and the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee.

Any increase in the liability relating to financial guarantees is recorded in the income statement. The premium received is recognised in the income statement in the caption "Net fee and commission income" on a straight-line basis over the life of the guarantee.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

(p) Pension benefits

The Bank operates a defined contributions pension plan. The contributions payable to a defined contributions plan is in proportion to the annual gross salary of the concerned employees and is recorded as an expense under “Administrative expenses”. Unpaid contributions are recorded as a liability.

(q) Provisions

Provisions are recognised when the Bank has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to any provision is presented in the income statement net of any reimbursement.

(r) Taxes

Income tax on the income statement for the year comprises current and deferred taxes. Income tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

(i) Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted at the reporting date.

(ii) Deferred income tax

Deferred income tax is provided using the liability method, on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interest in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profits will be available against which the deductible temporary differences, and the carry-forward of unused tax credits and unused tax losses can be utilised except:

- Where the deferred income tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interest in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES (continued)

will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred income tax is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised. Unrecognised deferred income tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Income tax relating to items recognised directly in equity is recognised in equity and not in the income statement.

NOTE 3 - SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Bank makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(a) Going concern

The Bank's Board of Directors has made an assessment of the Bank's ability to continue as a going concern and is satisfied that the Bank has the resources to continue in business for the foreseeable future. Furthermore, the Board of Directors is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the Financial Statements continue to be prepared on the going concern basis.

(b) Estimation of fair values of financial instruments

The following summarises the major methods and assumptions used in estimating the fair values of financial instruments.

(i) Securities

The fair values of quoted investments in active markets are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Bank establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants.

(ii) Derivatives

The fair value of derivatives is calculated, for listed instruments, on the basis of market prices ruling at the end of reporting period. When market prices are not available and/or reliable, valuation methods and models are used based on market-derived data (e.g. valuation of listed instruments with similar characteristics, discounted cash flow analysis, option price calculation methods, or valuation used in comparable transactions).

When discounted cash flow techniques are used, estimated future cash flows are based on Board of Directors' best estimates and the discount rate is a market related rate for a similar instrument at the reporting date. Where other pricing models are used, inputs are based on market related data at the reporting date.

(iii) Interest-bearing loans and borrowings

Fair value is calculated based on discounted expected future principal and interest cash flows.

Where quoted market prices or broker/dealer quotations are not available, prices for similar instruments or valuation pricing models are considered in the determination of fair value. Valuation pricing models consider contractual terms, position size, underlying asset prices, interest rates, dividend rates, time value, volatility and other statistical measurements for the relevant instruments or for instruments with similar characteristics. These models also incorporate adjustments relating to market liquidity adjustments. These adjustments are fundamental components of the fair value calculation process. The valuation technique used maximises the use of market inputs and recognizes the use of entity-specific inputs which are unobservable in the market.

NOTE 3 - SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Valuation pricing models and their underlying assumptions impact the amount and timing of recognised gains and losses recognised, and the use of different valuation pricing models or underlying assumptions could produce different financial results. Any changes in the fixed income, equity, and foreign exchange and commodity markets can impact the Bank's estimates of fair value in the future, potentially affecting trading gains and losses. The Bank's estimates of fair value may involve greater subjectivity due to the lack of transparent market data available upon which to base assumptions underlying valuation pricing models.

(iv) Other financial assets / liabilities

For other financial assets / liabilities with a remaining life of less than one year, the notional amount is deemed to reflect the fair value. All other receivables / payables are discounted to determine the fair value.

(c) Impairment

Assets are subject to impairment tests at the end of reporting periods. In determining whether an impairment loss should be recognised, the Bank makes judgements to ascertain whether there is any objective evidence that a financial asset or group of financial assets is impaired. If there is evidence of a long-term reduction in the value of the asset concerned, this is recognised in income statement on the basis of market prices in the case of listed instruments, and of estimated future cash flows discounted according to the original effective interest rate in the case of unlisted instruments. If the reasons for which the loss was recorded subsequently cease to apply, the impairment is written back to profit or loss accounts.

(d) Deferred taxes

Provisions for income taxes have been calculated on the basis of current, advance and deferred obligations. Advance and deferred taxes are calculated on the basis of temporary differences – without time limits – between the carrying amount of an asset or liability and its tax base.

Deferred tax assets and liabilities have been stated using the assumptions that the tax base of the assets and liabilities are determined by reference to Luxembourg tax principles.

NOTE 4 - CASH, CASH BALANCES AT CENTRAL BANKS AND OTHER DEMAND DEPOSITS (IN EUR)

	31 March 2022	31 March 2021
Cash on hand	---	1,067
Cash balances at central banks	633,600,000	792,419,918
Other demand deposits	132,376,714	341,435,528
Total	765,976,714	1,133,856,513

Credit institutions established in Luxembourg are required to hold minimum reserves with the Luxembourg Central Bank. These deposits represent 1% of some of their liabilities. Compliance with the reserve requirement is determined on the basis of the institutions' average daily reserve holdings over the maintenance period. Thus, reserves of credit institutions can vary from one day to another following their treasury management, the money market or their expectations in terms of interest rates.

Mandatory reserve deposits with the Luxembourg Central Bank are not used in the Bank's day to day operations.

NOTE 5 - DERIVATIVES HELD FOR TRADING - ASSETS (IN EUR)

They are composed of the positive fair values of equity linked swaps with an interest component contracts ("ELS") and forward foreign exchange transactions.

The Bank has entered into equity linked swaps contracts mainly in the context of its medium-term notes program (see Note 12). These transactions do not qualify for hedge accounting in accordance with IFRS 9 provisions. These transactions matured in as of 31 March 2022.

The Bank has entered into forward foreign exchange contracts mainly in the context of clients' transactions (these positions are then covered by a reverse transaction in the market) and, to a non significant extent, for dealing purposes.

	31 March 2022 Unlisted	31 March 2021 Unlisted
Derivatives on interest rates	---	185
Derivatives on foreign exchange rates	547,506,047	278,721,238
Total	547,506,047	278,721,423

As of 31 March 2022, the total notional amount of the ELS contracts is nil (2021: EUR 1,566,284), which is equal to the nominal of the notes (see Note 12).

Type of derivatives / Underlying items	Interest rates		Foreign currency		Total - 31 March 2022	
	Notional amount	Fair value	Notional amount	Fair value	Notional amount	Fair value

Total	231,172	185	10,533,870,540	278,721,238	10,534,101,712	278,721,423

NOTE 6 - FINANCIAL ASSETS MANDATORILY AT FAIR VALUE THROUGH PROFIT OR LOSS (IN EUR)

Debt instruments

They are composed of:

	31 March 2022	31 March 2021
Listed financial assets	1,323,328,486	604,815,472
Total	1,323,328,486	604,815,472

As of 31 March 2022, listed debt instruments are composed of Japanese, United Kingdom and European countries highly liquid corporate and government bonds with residual maturity of less than 6 months.

	31 March 2022	31 March 2021
France	322,254,163	27,098,317
Japan	607,362,530	407,647,999
Belgium	67,927,640	81,612,228
Germany	60,037,062	---
Netherlands	157,279,162	50,015,005
Ireland	50,004,725	---
United Kingdom	38,460,626	38,441,923
Luxembourg	20,002,578	---
Total	1,323,328,486	604,815,472

As of 31 March 2022 and 2021, the composition of listed debt instruments by counterparty type is the following:

	31 March 2022	31 March 2021
Public bodies	607,362,530	407,647,999
Other entities	715,965,956	197,167,473
<i>of which Credit Institutions</i>	<i>50,024,900</i>	<i>30,064,488</i>
Total	1,323,328,486	604,815,472

Collateral posted

As of 31 March 2022, the Bank has pledged debt securities which have a total fair value of EUR 137,237,495 (2021: EUR 99,658,221) of which EUR 117,234,917 (2021: EUR 92,468,640) in favour of Euroclear in order to benefit from a credit facility of USD 400 million maximum to cover daily settlement activity.

NOTE 7 - FINANCIAL ASSETS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME IN (EUR)

Equity instruments

They were composed of:

	31 March 2022	31 March 2021
Unlisted equity investments	15,673,888	14,995,387
Total	15,673,888	14,995,387

As of 31 March 2022 and 2021, financial assets at fair value through other comprehensive income are mainly composed of shares in the following affiliated undertakings:

Name:	Global Funds Management S.A.
Registered office:	33, rue de Gasperich L-5826 Hesperange
Proportion of the capital held:	100%
Amount of capital and reserves as of 31.03.2022:	EUR 9,622,468
Profit for the year ended 31.03.2022:	EUR 404,417
Amount of capital and reserves as of 31.03.2021:	EUR 9,380,273
Profit for the year ended 31.03.2021:	EUR 242,195

Name:	Global Funds Trust Company
Registered office:	c/o Maples & Calder P.O. Box 309, Ugland House George Town, Grand Cayman Cayman Islands
Proportion of the capital held:	100%
Amount of capital and reserves as of 31.03.2022:	EUR 3,687,125
Profit for the year ended 31.03.2022:	EUR 342,878
Amount of capital and reserves as of 31.03.2021:	EUR 3,346,310
Profit for the year ended 31.03.2021:	EUR 340,815

These affiliated undertakings are fair valued based on the latest available audited financial statements.

Financial assets at fair value through other comprehensive income are also composed, for an insignificant amount, of other unlisted securities.

NOTE 8 - FINANCIAL ASSETS AT AMORTISED COST (IN EUR)

	31 March 2022	31 March 2021
Loans and advances to:		
- Credit institutions	1,774,430,893	1,101,928,915
- Other financial corporations	389,390,658	79,282,470
- Households	408,271	460,609
Total	2,164,229,822	1,181,701,994

As of 31 March 2022, in accordance with IFRS 9, the Bank has recorded an ECL on its financial assets at amortised cost for an amount of EUR 16,559 (2021: EUR 13,383).

Credit institutions - breakdown:

	31 March 2022	31 March 2021
Reverse Repurchase agreements	470,747,834	102,883,380
Other term loans	1,289,625,854	996,297,584
Advances that are not loans	14,057,205	2,747,951
Total	1,774,430,893	1,101,928,915

Other financial corporations - breakdown:

	31 March 2022	31 March 2021
Reverse Repurchase agreements	161,172,875	75,528,894
Other term loans	210,924,470	775,089
Advances that are not loans	17,293,313	2,978,487
Total	389,390,658	79,282,470

Advances that are not loans are accounts receivable for the account of third parties. These accounts are “Transitory accounts” maintained by the Bank for operational purposes and are linked to the accounts payable for the account of third parties disclosed in the caption “Other financial liabilities” (Note 13).

Guarantees received as collateral

The reverse repurchase agreements are fully secured by government or corporate bonds.

NOTE 8 - FINANCIAL ASSETS AT AMORTISED COST (IN EUR) (continued)

Households - breakdown:

	31 March 2022	31 March 2021
Credit cards, personal loans and loans guaranteed by payrolls	408,271	490,609
Total	408,271	490,609

NOTE 9 - MOVEMENTS IN TANGIBLE AND INTANGIBLE ASSETS (IN EUR)

The following table presents the movements in tangible and intangible assets during the financial year:

Tangible and intangible assets	Gross value at the beginning of the financial year	Additions	Termination	Gross value at the end of the financial year	Accumulated depreciation at the beginning of the financial year	Termination	Accumulated depreciation at the end of the financial year	Net carrying value as of 31 March 2022	Net carrying value as of 31 March 2021
Tangible assets	23,855,795	10,003,236	(4,431,404)	29,427,627	(21,054,487)	4,431,404	(19,325,832)	10,101,795	2,801,308
of which:									
Computer hardware	12,485,622	238,669	---	12,724,291	(11,008,017)	---	(11,620,146)	1,104,145	1,477,605
Office furniture, fixtures, fittings and equipment	4,769,667	148,953	---	4,918,620	(4,684,719)	---	(4,727,971)	190,649	84,948
Right of use assets on buildings ¹	6,600,506	9,615,614	(4,431,404)	11,784,716	(5,361,751)	4,431,404	(2,977,715)	8,807,001	1,238,755
Intangible assets	44,619,875	1,265,460	---	46,885,335	(37,217,101)	---	(40,201,498)	6,683,837	8,402,774
of which:									
Computer softwares and licences	45,619,875	1,265,460	---	46,885,335	(37,217,101)	---	(40,201,498)	6,683,837	8,402,774

⁽¹⁾ These amounts relate to the application of IFRS 16.

For information, the Bank has entered into a new lease contract for its office premises which started on 1 April 2021 and ends on 30 April 2027.

NOTE 10 - OTHER ASSETS (IN EUR)

	31 March 2022	31 March 2021
Commissions receivable	9,569,408	8,463,122
Prepaid expenses	2,543,268	2,961,370
Other items	3,018,894	4,166,899
Total	15,131,570	15,591,391

Commissions receivable refer to fees receivable for the services (mainly Custodian, Administration and Paying Agency services) rendered by the Bank. A significant part of those commissions is usually claimed on a quarterly basis.

Other items are mainly composed of fees to be received from the Bank's subsidiaries in relation to Framework agreements in place and fees from Agency business with other Group counterparties (refer to Note 36).

NOTE 11 - DERIVATIVES HELD FOR TRADING - LIABILITIES (IN EUR)

Derivatives held for trading - Liabilities are composed of the negative fair values of the ELS and the forward foreign exchange contracts.

The Bank has entered into ELS in the context of the medium-term notes program (see Note 12). These transactions do not qualify for hedge accounting in accordance with IFRS 9 provisions. All these transactions matured as of 31 March 2022.

The Bank enters into forward foreign exchange contracts mainly in the context of clients' transactions (these positions are then covered by a reverse transaction in the market) and, to a non-significant extent, for dealing purposes.

	31 March 2022 Unlisted	31 March 2021 Unlisted
Derivatives on interest rates	---	414,833
Derivatives on foreign exchange rates	552,904,914	269,515,787
Total	552,904,914	269,930,620

NOTE 11 - DERIVATIVES HELD FOR TRADING - LIABILITIES (IN EUR) (continued)

Type of derivatives / Underlying items	Interest rates		Foreign currency		Total - 31 March 2022	
	Notional amount	Fair value	Notional amount	Fair value	Notional amount	Fair value
Unlisted derivative products						
Financial derivatives	---	---	13,095,808,966	552,904,914	13,095,808,966	552,904,914
Total	---	---	13,095,808,966	552,904,914	13,095,808,966	552,904,914

Type of derivatives / Underlying items	Interest rates		Foreign currency		Total - 31 March 2021

Total	1,335,112	414,833	10,418,803,216	269,515,787	10,420,138,328	269,930,620

NOTE 12 - FINANCIAL LIABILITIES DESIGNATED AT FAIR VALUE THROUGH PROFIT OR LOSS (IN EUR)

In 2017, the Bank has stopped issuing structured medium-term notes with structured coupon rates, including embedded derivatives with the consequence that the last note matured in March 2022. As of 31 March 2021, the nominal value of those notes was amounting to EUR 1,566,284.

The Bank has decided to use the fair value option (see Note 2 (d) (v)) to measure these debt certificates under the medium-term notes program due to their embedded derivatives. These financial instruments are not listed on an active market. Their fair value was calculated using a valuation technique (see Note 32).

In the context of the medium-term notes program, the Bank has entered into equity linked swap transactions (see Notes 5 and 11). These transactions matured as of 31 March 2022.

NOTE 13 - FINANCIAL LIABILITIES AT AMORTISED COST (IN EUR)

Amounts due to credit institutions

As of 31 March 2022 and 2021, they are composed of:

	31 March 2022	31 March 2021
Overdraft	1,279,079	1,195,792
Collaterals	24,578,843	---
Total	25,857,922	1,195,792

Amounts due to customers

As of 31 March 2022 and 2021, they are composed of:

	31 March 2022	31 March 2021
Current accounts	3,265,851,598	2,114,627,234
Term deposits	586,254,036	483,177,609
Total	3,852,105,634	2,597,804,843

Other financial liabilities

As of 31 March 2022 and 2021 they are composed of:

	31 March 2022	31 March 2021
Other financial liabilities	40,807,266	6,794,171
<i>of which lease liabilities</i>	9,456,672	1,067,730
Total	40,807,266	6,794,171

Other financial liabilities are accounts payable for the account of third parties. These accounts are “Transitory accounts” maintained by the Bank for operational purposes and are linked to the accounts receivable for the account of third parties disclosed in the caption “Financial assets at amortised cost” (Note 8).

For information, the Bank has entered into a new lease contract for its office premises which started on 1 April 2021 and ends on 30 April 2027.

NOTE 14 - TAX EXPENSE/INCOME, TAX ASSETS AND TAX LIABILITIES (IN EUR)

The components of income tax expense/income, tax assets and tax liabilities for the years ended 31 March 2022 and 2021 are as follows:

	31 March 2022	31 March 2021
Current tax assets	8,219,302	8,219,302
Deferred tax assets	1,362,707	2,197,819
- due to temporary deductible differences	1,362,707	2,197,819
- due to carry-forward of unused tax credits	---	---
- due to carry-forward of unused tax losses	---	---
Total tax assets	9,582,009	10,417,121
Current tax liabilities	10,194,042	4,334,717
Deferred tax liabilities		
- due to temporary taxable differences	3,137,389	3,682,992
Total tax liabilities	13,331,431	8,017,709
Income tax	31 March 2022	31 March 2021
Current taxes	5,815,824	1,806,519
<i>related to the fiscal year</i>	5,815,824	2,395,320
<i>related to previous years</i>	---	(588,801)
Deferred taxes	180,695	1,674,431
<i>related to the fiscal year</i>	180,695	(5,569)
<i>related to previous years</i>	---	1,680,000
Total	5,996,519	3,480,950

NOTE 14 - TAX EXPENSE/INCOME, TAX ASSETS AND TAX LIABILITIES (IN EUR) (continued)

The reconciliation between the tax expense/income and the accounting profit multiplied by Luxembourg tax rate for the years ended 31 March 2022 and 2021 is as follows:

	31 March 2022	31 March 2021
Profit/(loss) before tax	24,166,130	15,128,707
Theoretical tax expense/income (24.94% rate)	(6,027,033)	(3,773,100)
+/- adjustments linked to:		
income not subject to tax	---	---
non-deductible expenses	123,265	14,597
Other	(92,751)	277,553
Total	(5,996,519)	(3,480,950)

NOTE 15 - OTHER LIABILITIES (IN EUR)

	31 March 2022	31 March 2021
Salary related contributions	2,131,222	2,004,200
Deferred income	8,090,021	7,186,391
Other	4,114,360	3,365,921
Total	14,335,603	12,556,512

Deferred income includes payments received by the Bank for its agency activities within its own medium term notes program and within other debt securities programs carried out by other companies of the Nomura Group for which the Bank delivers agency services (Calculation Agent, Paying Agent and Settlement Agent).

NOTE 16 - ISSUED CAPITAL (IN EUR)

As of 31 March 2022 and 2021, the Bank's authorised, subscribed and paid-up capital amounts to EUR 28,000,000, represented by 2,800 ordinary shares with a nominal value of EUR 10,000 each.

NOTE 17 - RESERVES (INCLUDING RETAINED EARNINGS) (IN EUR)

Under Luxembourg law, the Bank must appropriate to a legal reserve an amount equivalent to at least 5% of the annual net profit until such reserve is equal to 10% of the share capital. This appropriation is made in the following year. Distribution of the legal reserve is restricted.

Luxembourg tax legislation provides for a reduction in the net worth tax equal to its global amount on the condition that a special reserve is established in an amount equal to 5 times the net worth tax reduction for the current year, and maintained for 5 years.

Allocation of the net result for the year ended 31 March 2021:

Profit for the year ended 31 March 2021	11,647,757
Distribution of dividend	(13,720,000)
Release of the NWT reserve 2016	10,850,000
Allocation to the NWT reserve 2022	(8,750,000)
Allocation to retained earnings	27,757

NOTE 18 - ASSETS AND LIABILITIES DENOMINATED IN FOREIGN CURRENCIES

As of 31 March 2022, the aggregate amount of the Bank's assets denominated in currencies other than EUR, translated into EUR, amounts to EUR 3,548,468,132 (2021: EUR 2,246,066,081).

As of 31 March 2022, the aggregate amount of the Bank's liabilities denominated in currencies other than EUR, translated into EUR, amounts to EUR 4,067,696,652 (2021: EUR 2,616,404,237).

NOTE 19 - INTEREST AND SIMILAR INCOME (IN EUR)

	31 March 2022	31 March 2021
Derivatives - trading	28,181	121,003
Debt securities	376,932	1,187,212
Loans and advances	3,134,409	4,904,788
Deposits	3,891,636	3,601,769
Total	7,431,158	9,814,772

NOTE 20 - INTEREST AND SIMILAR EXPENSES (IN EUR)

	31 March 2022	31 March 2021
Debt securities (negative interest rates)	(1,321,437)	(1,696,818)
Loans and advances (negative interest rates)	(3,135,257)	(1,657,958)
Deposits	(679,689)	(488,345)
Debt securities issued	(23,977)	(95,134)
Interest on lease liabilities	(76,849)	(18,066)
Total	(5,237,209)	(3,956,321)

NOTE 21 - DIVIDEND INCOME

No dividend has been received for the years ended 31 March 2022 and 2021.

NOTE 22 - NET FEE AND COMMISSION INCOME (IN EUR)

	31 March 2022	31 March 2021
Administration fees	24,345,086	27,378,158
Custody fees	11,520,475	12,417,397
Other fees	21,160,674	15,719,828
Total fee and commission income	57,026,235	55,515,383
Total fee and commission expenses	(1,256,540)	(1,771,516)
Net fee and commission income	55,769,695	53,743,867

NOTE 23 - NET (UN)REALISED GAINS (LOSSES) ON FINANCIAL ASSETS AND LIABILITIES HELD FOR TRADING (IN EUR)

For the years ended 31 March 2022 and 2021, this caption includes the realised and unrealised gains and losses on derivative financial instruments held for trading.

	31 March 2022	31 March 2021
Derivatives on interest rates	414,648	10,822,805
Derivatives on foreign exchange rates	19,578,489	11,858,617
Total	19,993,137	22,681,422

NOTE 24 - NET (UN)REALISED GAINS/(LOSSES) ON NON-TRADING FINANCIAL ASSETS MANDATORILY AT FAIR VALUE THROUGH PROFIT OR LOSS (IN EUR)

	31 March 2022	31 March 2021
Debt securities	43,979	53,756
Total	43,979	53,756

NOTE 25 - NET (UN)REALISED GAINS (LOSSES) ON FINANCIAL LIABILITIES DESIGNATED AT FAIR VALUE THROUGH PROFIT OR LOSS (IN EUR)

	31 March 2022	31 March 2021
Debt securities issued	(414,648)	(10,822,805)
Total	(414,648)	(10,822,805)

NOTE 26 - FOREIGN EXCHANGE DIFFERENCES (IN EUR)

	31 March 2022	31 March 2021
Spot exchange on derivatives and other financial instruments		
Gains	369,206,795	422,257,856
Losses	(369,702,133)	(422,398,532)
Total	(495,338)	(140,676)

NOTE 27 - ADMINISTRATIVE EXPENSES (IN EUR)

	31 March 2022	31 March 2021
Wages and salaries		
- Wages and salaries	26,143,077	25,990,372
- Social contributions	2,757,490	2,748,339
- Other expenses	1,258,392	1,308,658
- Defined contributions plan	502,150	535,326
Total wages and salaries	30,661,109	30,582,695
Other administrative expenses		
- Advisory and audit fees ⁽¹⁾	967,307	1,111,810
- Legal fees	162,174	42,629

- Membership subscription	2,248,721	1,926,798
- IT costs	6,902,914	7,791,447
- Pricing and other services	4,847,210	5,141,174
- Other	342,097	340,674
Total other administrative expenses	15,924,527	16,835,126
Total administrative expenses	46,585,636	47,417,821

⁽¹⁾ Refer to Note 31 for the detail of the fees paid to the Réviseur d'entreprises agréé.

NOTE 28 - AMORTISATION AND IMPAIRMENT (IN EUR)

For the years ended 31 March 2022 and 2021, amortization and impairment are as follow:

31 March 2022	Amortisation	Impairment	Total
Tangible assets	2.702.749	---	2.702.749
of which:			
Owned assets	655.381	---	655.381
Right-of-Use assets	2.047.368	---	2.047.368
Intangible assets	2.984.397	---	2.984.397
Total	5.687.146	---	5.687.146

31 March 2021	Amortisation	Impairment	Total
Tangible assets	3,606,478	---	3,606,478
of which:			
Owned assets	846,572	---	846,572
Right-of-Use assets	2,759,906	---	2,759,906
Intangible assets	2,836,101	---	2,836,101
Total	6,442,579	---	6,442,579

NOTE 29 - GUARANTEES, CONTINGENT LIABILITIES AND COMMITMENTS (IN EUR)

As of 31 March 2022 and 2021, the Bank's guarantees and commitments may be analysed as follows:

	31 March 2022	31 March 2021
Guarantees given		
Financial guarantees	67,670	80,630
Total	67,670	80,630

As of 31 March 2022 and 2021, guarantees given are composed of guarantees given on behalf of some of the Bank's employees to third parties for an amount of EUR 67,670 (2021: EUR 80,630).

NOTE 29 - GUARANTEES, CONTINGENT LIABILITIES AND COMMITMENTS (IN EUR) (continued)

Legal claims

Litigation is a common occurrence in the banking industry due to the nature of the business undertaken. The Bank has formal controls and policies for managing legal claims. Once professional advice has been obtained and the amount of loss reasonably estimated, the Bank makes adjustments to account for any adverse effects which the claims may have on its financial position.

Deposit guarantee schemes – Fonds de garantie des dépôts Luxembourg (« FGDL ») and Fonds de résolution (« FRL »)

The law related to the resolution, reorganization and winding-up measures of credit institutions and certain investment firms and on deposit guarantee and investor compensation schemes (the “Law”), transposing into Luxembourgish law the directive 2014/59/EU establishing a framework for the recovery and resolution of credit institutions and investment firms and the directive 2014/49/EU related to deposit guarantee and investor compensation schemes, was passed on 18 December 2015.

This new system will cover eligible deposits of each depositor up to an amount of EUR 100,000 and investments up to an amount of EUR 20,000. The Law also provides that deposits resulting from specific transactions or fulfilling a special social or other purpose are covered for an amount above EUR 100,000 for a period of 12 months.

The funded amount of the FRL shall reach by the end of 2024 at least 1% of covered deposits, as defined in article 1 number 36 of the Law, of all authorized credit institutions in all participating Member States. This amount will be collected from the credit institutions through annual contributions during the years 2015 to 2024. The amount paid by the Bank for the year ended 31 March 2022 in that respect is EUR 1,585,484 and is included under “Administrative expenses” (31 March 2021: EUR 1,229,841).

The target level of funding of the FGDL is set at 0.8% of covered deposits, as defined in article 163 number 8 of the Law, of the relevant credit institutions and is to be reached by the end of 2018 through annual contributions. The contributions are to be made in the form of annual payments during the years 2016 to 2018.

When the level of 0.8% is reached, the Luxembourg-based credit institutions should continue contributing for 8 additional years in order to reach an additional safety buffer of 0.8% of covered deposits as defined in article 163 number 8 of the Law.

No contribution was made for the year ended 31 March 2022 as the Bank had no covered deposits.

NOTE 30 - STAFF

For the years ended 31 March 2022 and 2021, the average number of Bank's staff is as follows:

	31 March 2022	31 March 2021
Management – Senior	4	4
Management – Middle	42	43
Other staff	249	252
Total	295	299

As of 31 March 2022 and 2021, the Bank has not granted any advances nor credits to members of its managerial bodies.

As of 31 March 2022 and 2021, the Bank has entered into guarantees on behalf of its managerial bodies (refer to Note 36).

NOTE 31 - FEES PAID TO THE RÉVISEUR D'ENTREPRISES AGRÉÉ (IN EUR)

For the years ended 31 March 2022 and 2021, the fees paid to the Réviseur d'entreprises agréé are split as follows (excluding VAT):

	31 March 2022	31 March 2021
Statutory audit of the financial statements	187,521	182,949
Other assurance services	88,000	88,000
Tax consulting services	---	---
Other services	---	---
Total	275,521	270,949

For the years ended 31 March 2022 and 2021, "Other assurance services" consisted of the issuance of a Service Organization Control ("SOC") Report Type II on global custody, fund accounting, transfer agency and information technology activities.

NOTE 32 - RISK MANAGEMENT (IN EUR)

In the Note 32, the concept of “hedging” is to be understood from an economic point of view and not from an IFRS point of view.

1. Three Lines of Defence Model

The Bank has adopted the “Three Lines of Defence” model as the outline for risk governance, comprising the following elements:

- 1) First line of defence refers to the business areas who own and manage their risks in accordance with agreed risk policies, limits and controls, at the operational level. It is composed of the Bank’s business activities, including Fund Administration Business Unit, Depositary & Custody Business Unit, Banking Services Business Unit, Client Support Business Unit, and Information Technology.
- 2) Second line of defence formed by the control and support functions are responsible for defining risk policies and risk processes and controls that contribute to the Bank’s overall risk control. For instance: Risk Management Department, Compliance Department, Corporate Legal Department, Fund Legal Department, Corporate Planning & Strategy Business Unit, the Data Privacy Manager and Information Security Department.
- 3) Third line of defence consists of the internal audit function, which provides independent, objective and critical review of the first two lines of defence.

2. Embedding risk governance across the Bank

■ Board of Directors

The Board of Directors has the ultimate responsibility for setting up the Bank’s appetite for risks and the tolerance limits. In case that the risk appetite is breached, the Board of Directors shall require corrective measures, which may need to be reported to the regulator as per regulatory requirements.

The Board of Directors shall globally define strategies and supervise the risk management and capital adequacy. The Board of Directors also ensures that Management establishes a framework for assessing the various risks, develops a system to relate risk to the Bank’s capital level and establishes a method for monitoring compliance with internal policies. The Board of Directors shall promote the risk culture across the Bank.

■ Executive Committee (“ExCom”)

The ExCom has the responsibility to manage the Bank’s day-to-day activities. Regarding risk management, the ExCom has to:

- 1) Implement the Risk Appetite;
- 2) Adopt and support Risk Management policies and procedures, including controls;
- 3) Set guidelines for the Risk Management framework;
- 4) Promote the risk culture across the Bank;
- 5) Define and review the risk strategy of the Bank.

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

■ Risk Management Committee

The purpose of this Committee is to assist the ExCom in fulfilling its responsibility with respect to:

- 1) Assess the adequacy between the risks incurred, the Bank's ability to manage these risks and the internal and regulatory own funds and liquidity reserves;
- 2) Oversight of the Bank's Risk Management framework, including the significant policies, procedures and practices used in managing the Bank's risks;
- 3) Review certain risk limits and regular risk reporting and make recommendations to the ExCom when appropriate;
- 4) Review operational risk events and root causes analysis.

The Risk Management Committee meets on a monthly basis and it is well represented by ExCom members as well as Senior Management of the business units.

■ Other Committees or Groups

The following Committees meet also on a regular basis to complement the risk governance of the Bank:

- 1) Audit Committee;
- 2) Asset and Liability Committee ("ALCO");
- 3) Business Continuity Management Committee;
- 4) Change Advisory Board;
- 5) Due Diligence Steering Committee;
- 6) NBL ExCom and HR Committee;
- 7) Information Security Committee;
- 8) Monthly Interest Review Meeting;
- 9) New Product Approval Committee;
- 10) Nostro Committee;
- 11) Pricing Advisory Group Committee;
- 12) Program Board;
- 13) Regulatory Steering Committee.

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

■ Risk Management Department ("RMD")

Risk Management department covers two activities.

- 1) Financial Risk, covering market risk, credit risk, liquidity risk and other financial risks;
- 2) Operational Risk, covering operational risk events, Risk Control Self-Assessment ("RCSA"), Key Risk Indicators ("KRI") and Scenario analysis.

(a) Market Risk: qualitative information

Market risk is the risk of losses arising from fluctuations in values of financial assets or debts (including off-balance sheet items) due to fluctuations in market risk factors (interest rates, foreign exchange rates, prices of securities and others). Exposure to this type of risk results from FX transaction dealing activities.

The related exposure to market risk is non-material for the Bank.

Foreign Exchange Risk

Exchange rates risk is the risk of loss arising from future movements in the exchange rates applicable to the currency positions maintained by the Bank. Similarly to all market risks, foreign exchange risk arises from both open and imperfectly offset or hedged positions.

- Foreign Exchange Risks on Own Positions

Acting upon the clients' orders, the Bank deals spot and forward transactions in JPY, USD, and other currencies. The highest transaction volumes are being performed on USD and JPY currencies.

The Forex Dealing Department has to hedge each customer's intra-day position with market counterparties. As such, no significant speculative transactions are carried out by the Bank for its own account.

The Bank's Risk Appetite defines the following open currency position limits:

- Open currency position less than EUR 150,000 equivalent per actively traded currency (with the exception of USD and JPY less than EUR 500,000 equivalent each);
- EUR 50,000 equivalent per other currency;
- Aggregate open position of EUR 2,500,000 equivalent.

Risk Management Department also performs an independent check against Forex Dealing Department figures and reports to ExCom on a daily basis.

- Foreign Exchange Risks on the Custody and Administration Fees

Another source of foreign exchange risk relates to the mismatch between expenses (mainly in EUR) and revenues as the invoices to funds clients are mainly denominated in non-EUR currencies (in USD and JPY).

The Forex Dealing Department has set up a procedure for converting estimated cash inflows resulting from its main source of revenues: the fund custody and administration fees.

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

The Forex Dealing Department monitors the trends of exchange rate curves and may suggest converting measures to cope with the risk attached to the negative variation of exchange rates.

This process allows the Bank to reduce its exposure on foreign exchange risk.

(b) Interest Rate Risk of the Banking Book

Interest rate risk is the potential adverse change in the Economic Value of the Equity (EVE) and in the Earnings of the Bank (Earnings at Risk – EaR) due to fluctuation in interest rates.

The Interest Rate Risk Appetite of the Bank is to maintain a low materiality as measured through different stress tests scenarios affecting both the EVE and the EaR. In the case of the EVE sensitivity is analysis under 16 scenarios regulatory and internal scenarios:

Scenario
-200bps
+200bps
Parallel Shock up
Parallel Shock down
Steeper
Flattener
Short Up
Short Down
1d 99% VaR 2Y down
1d 99% VaR 2Y up
European Bond Crisis
Idiosyncratic September 2014
Debt Ceiling Crisis & Downgrade in 2011
Greek crisis
Lehman
Idiosyncratic September 2011

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

And the EaR sensitivity is derived from two scenarios, of a +/-200 bps movement in interest rates, with a floor of -1%.

The analysis of the balance sheet split by time bucket reveals that the Bank is mainly exposed to interest rate risk for periods less than 1 year.

Despite this observation, according to the CSSF Circular 20/762, a calculation is performed twice a year to assess the impact on NBL balance sheet.

The results of the EaR analysis, indicate an impact of EUR -389,419 for a 200 bps increase of the interest rates and EUR +194,710 of impact for a decrease of 200 bps (2021: EUR -431,937 and EUR +431,937).

	Scenario 7 Short Up	Scenario 2 +200 bps	Scenario 3 Parallel Shock up
In the case of the EVE analysis, the results of the three worst scenarios for current and prior years are:	-3,598,324	-3,135,320	-2,686,356
	Scenario 2 +200 bps	Scenario 7 Short Up	Scenario 3 Parallel Shock up
PV Variation	-2,624,135	-2,402,428	-1,946,458
Capital Impact	-0.82%	-0.75%	-0.61%

This stress test confirmed the low level of interest rate risk to the Bank.

(c) Credit risk

Credit risk is the risk of loss arising from an obligor's default, insolvency or administrative proceeding which results in the obligor's failure to meet its contractual obligations in accordance with the agreed terms.

Counterparty Credit Risk

Counterparty credit risk is the risk associated to the deterioration of the creditworthiness of a counterparty.

Because of the nature of its activity, the Bank enters into a reduced set of transactions for its own account.

The credit risk management and monitoring are performed at two levels:

- Firstly, at local level, by the Risk Management Department;
- Secondly, at the level of the Nomura Group Credit Risk Management.

The applicable framework is defined in the Credit Risk Management Policy.

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

- On-Balance Sheet Transactions

The counterparty risk for on-balance sheet activities mainly concerns cash placements that are done on a daily basis by the Liquidity Management Department.

The major part of this liquidity comes from the cash held on the funds cash accounts under the Bank's custody. These cash positions are then placed on the market by the Bank as short-term deposits or reverse repos or invested in short term securities.

Every day, the Liquidity Management Department monitors its credit limits on the peak exposure of outstanding trades and the maximum tenor, which is a time limit of the exposure, as well as the regulatory large exposures limits.

These exposures are compared to the credit limits to define which initial or additional positions may be taken with a specific counterparty.

Risk Management Department performs relevant exposure control and monitoring and a credit risk report is sent by RMD on a daily basis to the ExCom.

Every morning, an extraction of all cash placements as of last business day is provided to the Nomura Group Credit Risk Management and the same day, the Liquidity Management Department and the Risk Management Department receive back from NIP a detailed report containing all the limits (exposure and tenor) and the actual positions by counterparty.

On top of the Bank's internal applicable controls, Nomura Group Credit Risk Management also performs the credit exposure monitoring of the nostro accounts the Bank holds with its counterparties and for the overdrafts of the funds' accounts in the Bank's books.

- Off-Balance Sheet Transactions

Foreign exchange transactions

The Bank enters into foreign exchange transactions with the investment funds under administration (in this case, the Bank is the counterparty of the funds) and then an opposite foreign exchange is performed with market counterparties (mainly Nomura Group).

- Netting agreements

The Bank enters into ISDA and CSA agreements with its counterparties with whom foreign exchange transactions are dealt.

The Bank benefits from the netting clause of those agreements, such that, in the event of a counterparty's failure to perform owing to default, bankruptcy, liquidation or any other similar circumstances, it would have a claim to receive or an obligation to pay only the net sum of the positive and negative mark-to-market values of included individual transactions.

To benefit from the netting clause, ISDA agreements are submitted to the CSSF for recognition as credit risk mitigation technique.

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

- Collateral Management Activities

The Bank is engaged in the following collateral management programmes:

Pledge of assets

Main credit risk exposure towards the investment funds comes from forward foreign exchange transactions. In order to reduce this exposure, the Bank has entered into Credit Support

Deeds (CSDs) with certain investment funds allowing taking financial collateral (cash or securities).

In case the exposure with one investment fund is going to exceed the Bank's Risk Appetite, the adequate amount of eligible collateral is transferred from the investment fund's portfolio and pledged to the collateral account in order to keep the exposure below the limit.

- Margin calls under CSA

For the forward foreign exchange transactions subject to regulatory margin rules and concluded between the Bank and investment funds or external counterparties, both counterparties to the transaction manage the economic potential loss or gain and require that collateral is allocated to cover the exposure, through a margining process.

The Bank has entered into ISDA/CSA agreements, which describe all the collateral requirements (eligibility, valuation, conditions) that must be followed to cover the mark-to-market exposure arising from these transactions.

In order to make sure that the margin calls are correctly handled, the Bank actively monitors the forward foreign exchange mark-to-market exposure and coverage on a daily basis. The conditions are negotiated by the Bank with the counterparties, and are in line with the Nomura Group Credit Risk guidelines.

- Securities Lending

For the securities lending activity, the Bank acts as an agent to allow Nomura International plc ("NIP"), which is the exclusive borrower, to borrow securities from the portfolios of the investment funds that agree to participate as lenders.

All the securities lent to NIP are pledged by collateral (USD cash amount or G-10 government bonds) in order to cover the counterparty risk. This collateral must represent 105% of the market value of the lent securities.

As agent, the Bank has the responsibility to manage the collateral pledged to cover the counterparty risk. The high eligibility criteria ensure appropriate liquidity of the collateral and the 105% margin covers the potential losses and costs generated by the lent securities buy-in.

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

- Exposures classes

The table below shows the credit risk exposure arising from financial assets following the standardised approach. Counterparty credit risk exposure arising from derivatives contracts are measured according to the mark-to-market method. Net exposure consists of the gross exposure less the amount of the collateral received at the reference date.

Balance sheet and off balance sheet exposures

31 March 2022	Gross exposures	Credit risk mitigation	Residual net exposures

Total	4,880,513,656	3,239,015,270

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

Collateral received or posted

The Bank posts or receives collateral with its counterparties in order to reduce the risk exposure arising from the forward foreign exchange transactions according to the legal agreements signed between parties, or to secure intraday settlement operations.

The securities received under reverse repurchase transactions are credit risk mitigants that reduce the credit risk exposure to the concerned counterparties.

	31 March 2022	31 March 2021
Fair value of cash collateral posted	227,347,582	68,255,747
Fair value of cash collateral received	24,578,844	---

Concentration risk

Concentration risk arises where the Bank becomes overly exposed on one particular counterparty, business area, issuer or geographical region thereby meaning the Bank's performance could be overly influenced by a small number of factors.

Large Exposures

The Bank complies with the Large Exposure limits defined by the applicable regulation, namely the EU Regulation 575/2013 which transposes Basel 3 framework at European level. The total risk exposure towards a single client or group of connected clients must not exceed 25% of the own funds of the Bank. In this context, the Bank has asked for and has been granted by CSSF a partial exemption for its intra-group transactions. This exemption has been recently renewed.

Intragroup exposures, in particular towards Nomura International plc ("NIP"), has been reduced through the use of short-term reverse repurchase transactions (secured loans).

Exposures with third-party financial institutions are limited to EUR 150 million per counterparty or group of connected clients.

As the Bank is mainly involved with high rated financial institutions established in OECD countries with stable political and economic environment, the country risk can be considered as limited.

Solvency ratio (or Capital ratio)

This ratio, as defined by the applicable regulation, defines the minimum amount of own funds that the Bank has to maintain in relation to the total risk-weighted assets and off-balance sheet items. The minimum level is 8%.

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

Impairment on financial assets

As of 31 March 2022, the ECL calculated on the financial assets amounts to EUR 17,759 (2021: EUR 14,528). There is no ECL on off balance-sheet exposures. During the year ended 31 March 2021, there were no transfer between Stage 1, Stage 2 and Stage 3.

ECL as at 31 March 2022

Balance-sheet exposures	Gross amount before ECL	Stage 1	Stage 2	Stage 3	ECL	Carrying Amount
Cash, cash balances at central banks and other demand deposits	765,976,801	765,976,801	---	---	(87)	765,976,714

(d) Liquidity risk

Liquidity for a bank is the ability to fund increases in assets and meet obligations as they come due, without incurring unacceptable losses, in both normal and stressed circumstances.

Liquidity risk is the risk of losses arising from difficulty in securing necessary funding or from a significantly higher cost of funding than normal levels due to deterioration of the Bank's creditworthiness or deterioration in market conditions (funding liquidity risk). It is also the risk of losses arising from an inability to easily liquidate assets at the market price because of market stresses or inadequate market depth (market liquidity risk).

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

(i) Liquidity Risk Profile

The Bank is a liability-driven bank which does not rely on the interbank market to fund its business. Liquidity is placed with both external and intra-group financial counterparties and in both secured and unsecured form, mainly on an overnight basis. The Bank maintains a securities portfolio as liquidity buffer or for collateral sourcing needs. Therefore, NBL has a limited exposure to funding-liquidity risk and market-liquidity risk.

NBL holds separately identified portfolios of securities for Liquidity Buffer purpose and as collateral to secure credit lines when required or to meet regulatory margin requirements. Portfolios are not for trading intent.

Regarding derivatives positions, the Bank has entered into:

- Foreign exchange ("FX") forward contracts taken for the funds (undertakings for collective investment administered by the Bank): 1 leg with the funds, 1 leg with market counterparties, both legs offset each other after consideration of market spread and currency position rounding.

Given the hedging and back-to-back structure of the above mentioned derivative positions, these positions do not have a material impact on the Bank's liquidity position.

The Bank may be subject to liquidity risk as a consequence of other risks, as identified hereafter:

- Counterparty-Credit Risk:

For NBL, the failure of its counterparties could impair its cash flows and hence its ability to meet its commitments as they fall due. This risk is mitigated at two levels. On one hand, Forex Dealing Department and Liquidity Management Department deal with selected counterparties within the limits that are in the NBL Risk Appetite Statement and, with particular reference to foreign exchange trades, daily collateral exchange allows the reduction of net exposures.

- Concentration Risk:

Concentrations of assets or liabilities can lead to liquidity problems. This risk is mitigated with the respect of credit and Large Exposures limits which prevent unacceptable concentration of counterparty exposures. Furthermore, the Bank complies with Nomura Global Investment Guidelines setting forth concentration limits in terms of country and product exposures.

- Operational Risk:

Significant problems can arise if the systems that process payment transactions or participants fail or delay transactions. Similarly, disruptions can be caused by operational problems at the level of critical participants or key third-party service providers. Cash Management activities are monitored by the Liquidity Management and Back Office departments. These activities are governed by clearly defined processes and procedures, which are periodically reviewed.

(ii) Liquidity Risk Appetite

The Bank's liquidity risk appetite is based on both internal and regulatory stress test models:

- Internal – Maximum Cumulative Outflow ("MCO"): The MCO is the Bank's primary Liquidity Risk Management tool for measuring and monitoring on a daily basis the liquidity pool against two internally defined stress scenarios.

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

The Risk Appetite requires that NBL maintains an excess Liquidity Buffer over the 12-month (Market Stress MCO) and 30-day (Acute MCO) outflows. The 30-day Acute MCO survival horizon is consistent with the Nomura Group Risk Appetite and the LCR model, and provides sufficient time to execute actions contained within the Bank's Contingence Funding Plan (CFP).

- External –

- Liquidity Coverage Ratio ("LCR"): The LCR is a regulatory Liquidity Risk measure of a financial institution's resilience to a stressed net cash outflow over a 30 day period, which is calculated in accordance with rules as set out in the CRR.
- Net Stable Funding Ratio ("NSFR"): The NSFR aims to promote resilience over a longer time horizon by creating incentives for banks to fund their activities with more stable sources of funding on an ongoing basis. It is a regulatory liquidity measure defined in the CRR.

(iii) Liquidity Measurement and Stress Testing

The main Liquidity Risk Measuring and Monitoring tools for the Bank are:

- 1) Maximum Cumulative Outflow ("MCO"): the MCO is the Bank's Liquidity Risk management stress test tool for measuring and monitoring on a daily basis the Bank's liquidity position against internally defined stress scenarios. The purpose of the model is to assess whether the size and composition of NBL's liquidity pool meets the Bank's liquidity risk appetite under normal and stressed circumstances.
- 2) Liquidity Buffer: a portfolio of highly liquid and unencumbered assets which serves as liquidity reserve and that can be monetized over a short time frame whenever deemed necessary to address stressed situations and according to the CFP. It cannot be lower than the internally defined minimum amount of liquidity that the Bank targets to keep available at any time, the Minimum Required Liquidity ("MRL");
- 3) Liquidity Coverage Ratio ("LCR"): the Bank calculates and reports to the CSSF the LCR on a monthly basis as requested by the regulation EU 680/2014.
- 4) The Bank calculates and reports to the CSSF the NSFR on a Quarterly basis as requested by the regulation EU 575/2013.

(iv) Liquidity Risk Controls and Mitigation

The MCO is run on a daily basis by Risk Management Department.

Liquidity Management Department is responsible for managing the liquidity buffer with "no trading intent" to ensure that the portfolio is classified within the banking book and not trading book. Risk Management Department monitors the value of the liquidity buffer and compares it to the minimum required level of liquidity on a daily basis.

Liquidity Management Department provides ExCom members with a daily report which gives an overview of the liquidity situation of the Bank, including a high-level status of the intra-group concentration. The same information is also used for reporting to Nomura Group Global Treasury and group consolidation.

A liquidity report is run daily and submitted to the BCL. This report identifies the cash inflows and outflows expected in the upcoming five days.

NOTE 32 - RISK MANAGEMENT (IN EUR) (continued)

Financial Accounting Department performs the Liquidity Coverage Ratio calculation and reporting to the CSSF and the BCL as required by the authorities.

Lastly, in case of emergency situation of liquidity shortage, the Head of Liquidity Management Department may invoke the Liquidity Task Force which will decide on the activation of the Contingency Funding Plan.

These procedures have been set out to deal with serious adverse market conditions. They operate on an incremental escalation basis where the triggers and related actions depend on the defined severity level (green, red, amber).

(g) Operational risk

The Bank has an Operational Risk Management Policy in place which defines the applicable Operational Risk Management Framework (Risk Appetite, incidents reporting, Key Risk Indicators, Risk and Control Self-Assessment).

Operational Risk is defined as the risk of loss arising from inadequate or failed internal processes, people and systems or from external events. It excludes strategic risk (the risk of loss as a result of poor strategic business decisions) but includes the risk of breach of legal and regulatory requirements, and the risk of damage to the Bank's reputation if caused by an Operational Risk event.

Operational Risk is deemed to be material for NBL.

Segregation of duties, internal procedures, and technological systems in place mitigate the risk of losses due to errors or inadequacies.

Besides, NBL has an insurance cover up to an amount of EUR 5 million per annum in the aggregate and once this limit has been reached the Bank is covered by a Group insurance up to an amount of GBP 20 million per loss and in the aggregate.

Finally, NBL has business continuity management in place (including a Disaster Recovery Plan) to ensure ability to operate on an ongoing basis and limit losses in the event of severe business disruption.

NOTE 33 - FAIR VALUE OF FINANCIAL INSTRUMENTS (IN EUR)

The following table summarises the carrying amounts and fair values of financial assets and liabilities at amortised cost in the statement of financial position.

	Carrying amount		Fair value	
	31 March 2022	31 March 2021	31 March 2022	31 March 2021
Assets				
Cash, cash balances at central banks and other demand deposits	765,976,714	1,133,856,513	765,976,714	1,133,856,513
Loans and advances	2,164,229,822	1,181,701,994	2,164,229,822	1,181,701,994
Liabilities				
Financial liabilities at amortised cost	3,918,770,822	2,605,794,806	3,918,770,822	2,605,794,806

The fair value of the financial assets and liabilities corresponds to the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

Fair value hierarchy

As of 31 March 2022 and 2021, the Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation techniques:

- Level 1: quoted prices (unadjusted) in active markets for identical assets and liabilities. This level includes listed equity securities and debt instruments on exchanges (for example, London Stock Exchange, Frankfurt Stock Exchange, New York Stock Exchange) and exchanges traded derivatives like futures (e.g. Nasdaq, S&P 500, etc.);
- Level 2: techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly;
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

NOTE 33 - FAIR VALUE OF FINANCIAL INSTRUMENTS (IN EUR) (continued)

31 March 2022	Level 1	Level 2	Level 3	Total
Financial assets				
Derivatives held for trading	---	547,506,047	---	547,506,047
Financial assets mandatorily at fair value through profit or loss – Debt instruments	1,323,328,486	---	---	1,323,328,486
Financial assets at fair value through other comprehensive income – Equity instruments	---	---	15,673,888	15,673,888
Total financial assets	1,323,328,486	547,506,047	15,673,888	1,886,508,421
Financial liabilities				
Derivatives held for trading	---	552,904,914	---	552,904,914
Financial liabilities designated at fair value through profit or loss	---	---	---	---
Total financial liabilities	---	552,904,914	---	552,904,914

31 March 2021	Level 1	Level 2	Level 3	Total
Financial assets				
Derivatives held for trading	---	278,721,423	---	278,721,423
Financial assets mandatorily at fair value through profit or loss – Debt instruments	604,815,472	---	---	604,815,472
Financial assets at fair value through other comprehensive income – Equity instruments	---	---	14,995,387	14,995,387
Total financial assets	604,815,472	278,721,423	14,995,387	898,532,282
Financial liabilities				
Derivatives held for trading	---	269,930,620	---	269,930,620
Financial liabilities designated at fair value through profit or loss	---	---	1,151,636	1,151,636
Total financial liabilities	---	269,930,620	1,151,636	271,082,256

During the years ended 31 March 2022 and 2021, in relation with financial instruments measured at fair value, there were no transfers between the Level 1 and Level 2 categories, and no transfers into and out of the Level 3 category.

During the year ended 31 March 2022, the movement in the financial assets at fair value through other comprehensive income classified in the Level 3 category mainly results from the revaluation of the related assets at their fair value.

NOTE 33 - FAIR VALUE OF FINANCIAL INSTRUMENTS (IN EUR) (continued)

During the year ended 31 March 2022, the movement in the financial liabilities designated at fair value through profit or loss can be analysed as follows:

Financial liabilities designated at fair value through profit or loss as of 31 March 2021	1,151,636
Gains/losses recognised in the income statement	414,648
Issuances	---
Redemptions	(1,514,206)
Foreign exchange rates fluctuations	(52,078)
Financial liabilities designated at fair value through profit or loss as of 31 March 2022	---

NOTE 34 - CAPITAL MANAGEMENT

The Bank maintains an actively managed capital base to cover risks inherent in the business.

The adequacy of the Bank's capital is monitored using, among other measures, the rules and ratios established by the Basel Committee on Banking Supervision (BIS rules/ratios) and adopted by the Commission de Surveillance du Secteur Financier supervising the Bank.

During the years ended 31 March 2022 and 2021, the Bank had complied in full with all its externally imposed capital requirements.

NOTE 35 - RETIREMENT BENEFIT PLAN

Since 2002, the Bank has entered into an agreement for payment of the retirement pension charges under the corporate defined contributions pension plan organized by its Parent company.

Only expatriate employees of the Bank are entitled to participate into this corporate pension plan.

NOTE 36 - RELATED PARTY DISCLOSURES (IN EUR)

The Bank has a related party relationship with its Parent company, entities of its Group and with its directors and executive officers.

The amounts of assets, liabilities, income and expenses as of 31 March 2022 and 2021 concerning Group entities, including the Parent company and subsidiaries, are split between subsidiaries and other Group companies as follows:

NOTE 36 - RELATED PARTY DISCLOSURES (IN EUR)

Subsidiaries:	31 March 2022	31 March 2021
Financial assets at fair value through other comprehensive income	15,567,418	14,892,697
Financial assets at amortised cost – Loans and advances	---	---
Other assets	1,474,294	1,424,294
Total assets	17,041,712	16,316,991
Financial liabilities at amortised cost	16,478,861	15,633,024
Total liabilities	16,478,861	15,633,024
Income and expenses	31 March 2022	31 March 2021
Net fee and commission income	6,677,175	6,217,500
Other group entities:	31 March 2022	31 March 2021
Derivatives held for trading	57,487,010	46,421,356
Financial assets at amortised cost – Loans and advances	161,179,041	75,528,894
Other assets	945,158	2,671,698
Total assets	218,666,051	124,621,948
Derivatives held for trading	269,322,682	127,668,804
Financial liabilities at amortised cost	1,472,168	1,418,550
Total liabilities	270,794,850	129,087,354
Income and expenses	31 March 2022	31 March 2021
Net interest income	80,039	71,121
Net fee and commission income	5,100,400	5,277,694
Total	5,180,439	5,348,815

NOTE 37 - REMUNERATION OF MANAGERIAL BODIES AND DIRECTOR'S FEES

The Bank's incurred expenses with respect to the remuneration of the members of the managerial bodies of the Bank are as follows:

	31 March 2022	31 March 2021
Managerial bodies	977,979	1,002,151
Corporate pensions	78,132	80,814
Total	1,056,111	1,082,965

As of 31 March 2022 and 2021, the Bank has issued guarantees on behalf of its managerial bodies as follows:

	31 March 2022	31 March 2021
Guarantees		
Managerial bodies	16,430	16,430
Total	16,430	16,430

The Bank's incurred expenses with respect to Director's fees are as follows:

	31 March 2022	31 March 2021
Director's Fees (gross)	50,000	50,000
Withholding Tax	10,000	10,000
Total	60,000	60,000

NOTE 38 - SUBSEQUENT EVENTS

The Bank is not aware of any adjusting or non-adjusting event that would have occurred between 31 March 2022 and the date when the present Financial Statements were authorised for issue.

NOTE 39 - PROPOSED ALLOCATION OF RESULT (IN EUR)

The Board of Directors proposes the following allocation of result:

Profit of the year	18,169,611
Release of the 2017 NWT reserve	11,700,000
Allocation to the 2023 NWT reserve	(8,800,000)
Dividend to distribute to shareholders	(21,000,000)
Allocation to retained earnings	69,611

This proposition will be submitted to the approval of the shareholders on 6 July 2022.
