Nomura Report 2018 Now Available

Nomura Holdings today issued the Nomura Report 2018, an integrated version of the firm's Annual Report and Citizenship Report.

In this seventh edition of the Nomura Report, we place the spotlight on Nomura's financial and non-financial activities, starting with our mission to contribute to economic growth and the creation of a prosperous society through the securities business. We highlight the synergies between our Wholesale and Retail businesses, our asset building services, efforts to leverage innovation in our business, and ESG bond market initiatives.

We hope that this integrated report helps readers better understand our aim to create a solid operating platform capable of delivering consistent growth in any market environment, and commitment to delivering a better tomorrow together with our stakeholders, including our clients and shareholders.

You can download the Report [here](#).
